Office of Naval Research, 1982      *Scientific Bulletin*, 1982      *The Knowledge-Creating Company* Ikujiro Nonaka, Hirotaka Takeuchi, 1995-05-18 How have Japanese companies become world leaders in the automotive and electronics industries among others What is the secret of their success Two leading Japanese business experts Ikujiro Nonaka and Hirotaka Takeuchi are the first to tie the success of Japanese companies to their ability to create new knowledge and use it to produce successful products and technologies In *The Knowledge Creating Company* Nonaka and Takeuchi provide an inside look at how Japanese companies go about creating this new knowledge organizationally The authors point out that there are two types of knowledge explicit knowledge contained in manuals and procedures and tacit knowledge learned only by experience

and communicated only indirectly through metaphor and analogy U S managers focus on explicit knowledge The Japanese on the other hand focus on tacit knowledge And this the authors argue is the key to their success the Japanese have learned how to transform tacit into explicit knowledge To explain how this is done and illuminate Japanese business practices as they do so the authors range from Greek philosophy to Zen Buddhism from classical economists to modern management gurus illustrating the theory of organizational knowledge creation with case studies drawn from such firms as Honda Canon Matsushita NEC Nissan 3M GE and even the U S Marines For instance using Matsushita s development of the Home Bakery the world s first fully automated bread baking machine for home use they show how tacit knowledge can be converted to explicit knowledge when the designers couldn t perfect the dough kneading mechanism a software programmer apprenticed herself with the master baker at Osaka International Hotel gained a tacit understanding of kneading and then conveyed this information to the engineers In addition the authors show that to create knowledge the best management style is neither top down nor bottom up but rather what they call middle up down in which the middle managers form a bridge between the ideals of top management and the chaotic realities of the frontline As we make the turn into the 21st century a new society is emerging Peter Drucker calls it the knowledge society one that is drastically different from the industrial society and one in which acquiring and applying knowledge will become key competitive factors Nonaka and Takeuchi go a step further arguing that creating knowledge will become the key to sustaining a competitive advantage in the future Because the competitive environment and customer preferences changes constantly knowledge perishes quickly With The Knowledge Creating Company managers have at their fingertips years of insight from Japanese firms that reveal how to create knowledge continuously and how to exploit it to make successful new products services and systems Caterpillar Chronicle : History of the Greatest Earthmovers Eric C.
