Mount of Aces Paul R. Hare,2013-03 The Sopwith Camel may be the best known British fighter of World War 1 but almost all scoring aces preferred the Royal Aircraft Factory S E 5a It was well armed fast maneuverable and a superb gun platform This is a fitting tribute to a design now nearly a century old and a memorial to the pilots who flew it in combat *Mount of Aces: The Royal Aircraft Factory S.E.5a* Paul R. Hare,2014-03-27 From the author of Fonthill Media s Fokker Fodder The Royal Aircraft Factory B E 2c Mount of Aces The Royal Aircraft Factory S E 5a is a fitting testament to a legendary fighter Arguably the Sopwith Camel may be the best known British fighter plane of the First World War that took on the mighty and feared Jastas over the killing fields that were the trenches However almost all the highest scoring aces including McCudden and Mannock preferred the Royal Aircraft Factory S E 5a It was well armed fast highly manoeuvrable and a superb gun platform and yet it was easy and safe for even the most sketchily trained pilot to fly The S E 5a was deadly Not only could it absorb punishment and turn on a penny it packed a wallop with its 303 Vickers and 303 Lewis machine guns Over 5 500 examples were produced in the war and Major Edward C Mick Mannock scored fifty of his seventy three victories in the S E 5a The S E 5a helped turn the tide of war in the Allies favour After the war examples took part in air races and were employed in the sky writings industry for advertising purposes in both Britain and America And today all over the world home builders are producing reproductions of the S E 5a for sport and leisure flying a fitting tribute to a design now nearly a century old and an appropriate memorial to the thousands of pilots who flew it in combat in defence of their country

Dusch Jr.,2025-02-04 In 1927 when aviator Charles A Lindbergh flew his famous monoplane in a triumphant tour of the United States the Spirit of St Louis touched down in Wheeling West Virginia for his visit to the Linsly School There Lindbergh laid a wreath at the foot of the Aviator a statue erected by Sallie Maxwell Bennett bearing the likeness of her son Louis Bennett Jr West Virginia s only First World War flying ace Though largely unknown today Bennett was an airpower innovator whose tragically short combat career would have an enduring impact on American flight and on war memorials both at home and abroad In Balloon Ace The Life of an Early Airpower Visionary historian Charles Dusch reconstructs Louis Bennett Jr s lost legacy Advocating for a national aviation reserve years before the writings of Billy Mitchell Bennett created a state aerial militia in 1917 complete with supporting airbases and an airplane factory When the US Army refused to accept his unit a frustrated Bennett joined the Royal Air Force to fight on the Western Front destroying nine German balloons and three aircraft in a matter of days before he himself was shot down In the second act of Bennett s story Dusch traces Sallie Bennett s quest to clandestinely recover her son s body Posing as a journalist Sallie traveled to Europe searching the cemeteries on the Western Front and later commissioned twelve memorials to Bennett including a chapel in France the RAF window in Westminster Abbey and the Aviator at Linsly Moved by the vast destruction of the continent she would eventually cross political boundaries to bring much needed publicity to other mothers demands for the US government to repatriate their own fallen loved ones From West Virginia to the Western Front and back again Balloon Ace is more than a multifaceted and insightful account of the pioneer aviators who prepared the United States for combat in the first air war it is also a remarkable look at the commemoration culture that spanned the American Civil War to war torn Europe in the early twentieth century

British and Empire Aces

of World War 1 Christopher Shores,2012-11-20 An illustrated history of how the British fighter developed both single and two seaters At the outset of World War I the British had some 110 assorted aircraft used mostly for the visual reconnaissance role With the advent of faster and more agile single seaters the Allies and their adversaries raced to outdo each other in the creation of genuinely effective fighters with fixed forward firing machine gun armament It was not until 1917 that the British developed a truly effective interrupter gear which paved the way for excellent single seaters such as the Sopwith Triplane Camel and the RAF S E 5 later joined by the Bristol F 2B the war s best two seat fighter This volume traces the rapid development of the fighter in World War I and the amazing exploits of the British and Empire aces who flew them Taking Flight Richard P. Hallion,2003-05-08 The invention of flight represents the culmination of centuries of thought and desire Kites and rockets sparked our collective imagination Then the balloon gave humanity its first experience aloft though at the mercy of the winds The steerable airship that followed had more practicality yet a number of insurmountable limitations But the airplane truly launched the Aerial Age and its subsequent impact from the vantage of a century after the Wright Brother s historic flight on December 17 1903 has been extraordinary Richard Hallion a distinguished international authority on aviation offers a bold new examination of aircraft history stressing its global roots The result is an interpretive history of uncommon sweep complexity and warmth Taking care to place each technological advance in the context of its own period as well as that of the evolving era of air travel this ground breaking work follows the pre history of flight the work of balloon and airship advocates fruitless early attempts to invent the airplane the Wright brothers and other pioneers the impact of air power on the outcome of World War I and finally the transfer of prophecy into practice as flight came to play an ever more important role in world affairs both military and civil Making extensive use of extracts from the journals diaries and memoirs of the pioneers themselves and interspersing them with a wide range of rare photographs and drawings Taking Flight leads readers to the laboratories and airfields where aircraft were conceived and tested Forcefully yet gracefully written in rich detail and with thorough documentation this book is certain to be the standard reference for years to come on how humanity came to take to the sky and what the Aerial Age has meant to the world since da Vinci s first fantastical designs **The World's Greatest Aircraft** Christopher Chant,1991 **The Aircraft-Spotter's Film and Television Companion** Simon D. American Curtiss series and the Lockheed Lightning A Century of Triumph Christopher Chant, 2002 On December 17 1903 on the windswept beaches of Kitty Hawk North Carolina Orville Wright piloted the world's first powered flight in one of the most famous moments in history Within a few short years airplanes of various designs were lifting into the air over Europe and America Soon the entire world was caught up in the fevered advance of flight and airplanes Zeppelins autogyros and helicopters were making the world a much smaller place To celebrate the first full century of powered flight premier aviation historian Christopher Chant and world famous illustrator John Batchelor have joined forces to showcase an astonishing march of progress From the early experiments of gliderman Otto Lilienthal to the moon walk of Neil Armstrong it has indeed been A Century of Triumph From the golden age of Zeppelins to the extreme design experiments of World War II to the fierce modernism of supersonic fighter jets A CENTURY OF TRIUMPH demonstrates the full richness of mankind's flying craft In addition to Batchelor's illustrations the book features never before published vintage watercolour posters of pre World War I aviation races and a treasure trove of photographs Chant's text combines full histories of the planes themselves with biographical essays on some of the great figures of the twentieth century the Barnstormers Igor Sikorsky Amelia Earhart Chuck Yeager and the Apollo XVII astronauts among others A CENTURY OF TRUMPH is a visual and factual feast for anyone who marvels at the majesty of flying A History of Aviation at Brooklands in 100 Objects Nigel Spooner, 2024-06-30 At the dawn of the twentieth century mankind had not yet achieved powered flight The main motive power then was provided by steam engines heavy dirty and inefficient If one wanted to travel over seas one had to travel on them A journey from London to New York by steam driven train and ship took more than 6 days By the time the same century drew to a close in December 1999 air travel was the normal choice for long journeys Millions of people every day flew comfortably and safely in pressurised aluminium airliners propelled by simple clean and efficient gas turbine engines The same journey from London to New York could be achieved at supersonic speed in less than 6 hours For much of that century many of the extraordinary developments that moved aviation from fragile wood and fabric biplanes to supersonic transports were achieved on 330 acres of low lying former estate farmland in Surrey England The estate was called Brooklands Those marshy acres were transformed from 1907 into the world's first custom built motor racing circuit then a rapidly developing aerodrome and finally one of the country's largest aircraft factories employing tens of thousands of people Nearly 19 000 aircraft of many different types were built at Brooklands during nine decades of peace and war By the 1980s however it was being eclipsed by larger manufacturing sites elsewhere with longer runways and better communications links its owner by then called British Aerospace finally closed the factory in 1989 This book tells the history of those amazing developments through 100 of the key aircraft engines places and other objects that can still be seen either in or near Brooklands Museum or in other locations around the country It also highlights the stories of six designers whose inspiring creativity produced aircraft engines and weapons ranging from Camel to Concorde Fury to Harrier Wellington to Viscount Merlin to Olympus

Between them Thomas Sopwith Barnes Wallis Rex Pierson Sydney Camm Stanley Hooker and George Edwards were responsible for much of what was designed built and flown not only at Brooklands but elsewhere too The book is arranged in successive historical episodes but the many links between the objects and the designers should allow readers to follow different paths if they so wish It is not intended as a technical reference but rather to inspire the reader to seek out the objects and discover more about them
