**Great Brexit Swindle** T. J. Coles, 2016-12-02 In his urgent new book T J Coles uncovers the forces seeking to uncouple Britain from the European Union Allied to an expanding core of free market fanatics in the Conservative party is a powerful group of globalists and financial traders Their political ideology is neoliberalism a worldwide agenda that seeks to deregulate markets and maximize profits for global elites at the expense of working people The effect is a growing gap internationally between rich and poor Digging deep into the funding campaign The Great Brexit Swindle documents the potent self serving interests behind Brexit In the wake of the financial crisis of 2008 mega rich hedge fund managers and billionaire CEOs are keen to be rid of Brussels and its red tape regulation Their anti European political allies meanwhile are preparing to corner markets in Asia and South America whilst expanding Britain s military capacity as a back up to economic penetration Brexit

was sold to the public as a once in a lifetime opportunity to regain sovereignty control immigration and increase the nation's wealth. But despite the manifold promises of Brexiteers, Coles demonstrates that economic globalization will lead to growing job insecurity and greater immigration once British workers are put in direct competition with the huge poor populations of countries like Brazil, China, Mexico, and India. Increasing free market trade worldwide leaves Britain open to low quality products such as hormone treated American beef and genetically modified foods whilst the new planned trade agreements would only accelerate the privatization of public services. Although Coles is not an advocate for the EU, he argues that the Brexit agenda is designed only to serve the interests of the wealthy and increasingly powerful 0.1% of the population.

**Plato's Pigs and Other Ruminations** M. D. Usher, 2020-10-15. The Greeks and Romans have been charged with destroying the ecosystems within which they lived. In this book, however, M. D. Usher argues rather that we can find in their lives and thought the origin of modern ideas about systems and sustainability, important topics for humans today and in the future. With chapters running the gamut of Greek and Roman experience from the Presocratics and Plato to Roman agronomy and the Benedictine Rule, Plato's Pigs brings together unlikely bedfellows both ancient and modern to reveal surprising connections. Lively prose and liberal use of anecdotal detail, including an afterword about the author's own experiments with sustainable living on his sheep farm in Vermont, add a strong authorial voice. In short, this is a unique first of its kind book that is sure to be of interest to anyone working in Classics, environmental studies, philosophy, ecology, or the history of ideas.

The Triple Package Amy Chua, Jed Rubenfeld, 2014. It may be taboo to say so, but some groups in this country do better than others. Mormon, Cuban, Nigerian, and Chinese Americans have all recently achieved astonishing business success. This book uncovers the secret to their success. Page 4 de la couverture. Revitalizing Governance, Restoring Prosperity, and Restructuring Foreign Affairs Earl H. Fry, 2014-07-22. The American people generally perceive that the United States is headed in the wrong direction. US influence worldwide is waning. Capitol Hill is not adequately representing the public's interests and their personal economic wellbeing is in jeopardy. This book squarely tackles the list of fault lines currently facing the United States, including among others: Beltway dysfunctionality, concentrated wealth and income not seen since the late 1920s, an ultra-expensive and inefficient health care system, runaway entitlement spending, stagnant upward mobility, debilitating crony capitalism, and incoherent foreign policy. Even more importantly, the book offers explicit policy recommendations for solving each fault line, relying extensively on best practices in the public and private sectors both at home and abroad. Moreover, the author emphasizes that the United States is entering a special period which provides it with advantages not found anywhere else in the world: a major energy boom, favorable demographics, unparalleled high technology innovation, huge inward investment flows from abroad, the revival of its manufacturing sector, and its magnetism in attracting to its shores the very best and brightest from around the world. Dr. Fry asserts that it is quite reasonable to assume that the United States will enter a Renaissance America period by 2030. Doing so, however, will require painful short-term sacrifices.

major policy changes and the restoration of vibrant representative government In effect the American people must overwhelmingly embrace Abraham Lincoln's vision of governance of the people by the people and for the people *In Defense of Housing* Peter Marcuse, David Madden, 2016-08-16 In every major city in the world there is a housing crisis How did this happen and what can we do about it Everyone needs and deserves housing But today our homes are being transformed into commodities making the inequalities of the city ever more acute Profit has become more important than social need The poor are forced to pay more for worse housing Communities are faced with the violence of displacement and gentrification And the benefits of decent housing are only available for those who can afford it *In Defense of Housing* is the definitive statement on this crisis from leading urban planner Peter Marcuse and sociologist David Madden They look at the causes and consequences of the housing problem and detail the need for progressive alternatives The housing crisis cannot be solved by minor policy shifts they argue Rather the housing crisis has deep political and economic roots and therefore requires a radical response
