

ChemThink: Behavior of Gases

Name _____ Per _____

1. What does the speed of atoms depend on? Describe the relationship between speed and each of these factors.

temperature: $\uparrow$ temp = $\uparrow$ speed

type of atom: smaller/lighter = faster

2. In a sample of one type of atom, do all the atoms move at the same speed? Why?

No, speed is related to each individual atoms energy

3. What is the equation for Pressure and what are the units for pressure?

$$\text{Pressure} = \frac{\text{Force}}{\text{Area}} \quad \text{psi}$$

4. When atoms are moving in a closed container what is creating the force on the sides of the container?

impacts (collisions) of atoms w/ sides of container

5. Explain how a change in temperature causes pressure to change and include an equation.

more collisions results in higher pressure

$\downarrow$
b/c molecules moving faster

$$\frac{P}{T} = \text{constant}$$

6. Draw the graph you observed of pressure vs. temperature. Is this a direct relationship or an inverse relationship?

direct

7. Fill the cause/effect relationship in the diagram of boxes you observed.

- Explain how the number of atoms present causes pressure to change and include an equation?

more atoms = more collisions, which increases pressure

$$\frac{P}{n} = \text{constant}$$

Chemistry in the Community (ChemCom) American Chemical Society, 2011-06-17 Touted as the most successful NSF funded project published Chemistry in the Community ChemCom by the American Chemical Society ACS offers a meaningful and memorable chemistry program for all levels of high school students ChemCom covers traditional chemistry topics within the context of societal issues and real world scenarios Centered on decision making activities where students are responsible for generating data in an investigating analyzing that data and then applying their chemistry knowledge to solve the presented problem The text is intensively laboratory based with all 39 of the investigations integrated within the text not separate from the reading With the ChemCom program students learn more organic and biochemistry more environmental and industrial chemistry and more on the particulate nature of matter than other textbooks all within the relevance of solving problems that arise in everyday life Meticulously updated to meet the needs of today's teachers and students the new sixth edition of ChemCom adheres to the new science framework as well as the forthcoming next generation of science standards Incorporating advances in learning and cognitive sciences ChemCom's wide ranging coverage builds upon the concepts and principles found in the National Science Education Standards Correlations are available showing how closely aligned ChemCom is to these and other state standards

Chemistry Carla Mooney, 2016-05-16 Have you ever wondered what makes up everything in the world around you Or what exactly is the difference between solids liquids and gases Have you wanted to know what causes two substances to react or change Chemistry Investigate the Matter that Makes Up Your World introduces readers 12 through 15 to the fascinating world of protons neutrons and electrons Learn how these molecules combine to form ordinary objects such as the chair you're sitting on the water in your glass even you Through hands on investigative projects readers delve into the world of chemical reactions and changing matter learning how these principles are used in many areas of science from biochemistry to nuclear science Combining hands on science inquiry with chemistry mathematics and biology projects include building models of molecules and bonds identifying acids and bases investigating the effect of temperature on reaction rate and observing how a chemical reaction from vinegar water and bleach can accelerate the rusting of steel Chemistry offers entertaining illustrations and fascinating sidebars to illuminate the topic and engage readers further plus integrates a digital learning component by providing links to primary sources videos and other relevant websites

More Chemistry Basics William C. Robertson, 2010 Overwhelmed by orbitals Terrified of thermodynamics Agitated by acids and bases Have no fear This follow up to the award winning Chemistry Basics will clear up your chemistry woes In More Chemistry Basics the ninth book in the Stop Faking It series author Bill Robertson introduces additional chemistry concepts such as special reactions and half lives and expands on many previously discussed ideas including electron energy levels and why we can't know exactly what electrons are doing and where they are Robertson explains science basics using easy to follow activities that help teachers learn the fundamentals and more Like other books in

this series More Chemistry Basics will prove invaluable for teachers parents and home school providers who want to feel greater confidence in the content they teach Roberson s humourous and honest approach will help you brush up on chemistry concepts and feel more prepared even excited to teach chemistry to your students **Chemistry For Dummies** John T. Moore,2011-05-12 Chemistry For Dummies 2nd Edition 9781118007303 is now being published as Chemistry For Dummies 2nd Edition 9781119293460 While this version features an older Dummies cover and design the content is the same as the new release and should not be considered a different product See how chemistry works in everything from soaps to medicines to petroleum We re all natural born chemists Every time we cook clean take a shower drive a car use a solvent such as nail polish remover or perform any of the countless everyday activities that involve complex chemical reactions we re doing chemistry So why do so many of us desperately resist learning chemistry when we re young Now there s a fun easy way to learn basic chemistry Whether you re studying chemistry in school and you re looking for a little help making sense of what s being taught in class or you re just into learning new things Chemistry For Dummies gets you rolling with all the basics of matter and energy atoms and molecules acids and bases and much more Tracks a typical chemistry course giving you step by step lessons you can easily grasp Packed with basic chemistry principles and time saving tips from chemistry professors Real world examples provide everyday context for complicated topics Full of modern relevant examples and updated to mirror current teaching methods and classroom protocols Chemistry For Dummies puts you on the fast track to mastering the basics of chemistry American Gas-light Journal and Chemical Repertory ,1909 Articulating the World Joseph Rouse,2015-11-13 Naturalism both disavows any appeal to the supernatural or anything else transcendent to nature and repudiates any philosophical or religious authority over the workings and conclusions of the sciences Paradoxically however scientific knowledge itself appears to transcend nature seemingly making it impossible to conceptualize within scientific naturalism In Articulating the World Joseph Rouse takes up this challenge drawing on recent developments in evolutionary biology and the philosophy of science to defend naturalism by revising both how we understand our scientific conception of the world and how we situate ourselves within it *Student's Guide to Masterton and Slowinski's Chemical Principles* Ray Boyington,William L. Masterton,1977 *Physical and Chemical Mechanisms in Molecular Radiation Biology* William A. Glass,Matesh N. Varma,2012-12-06 The fundamental understanding of the production of biological effects by ionizing radiation may well be one of the most important scientific objectives of mankind such understanding could lead to the effective and safe utilization of the nuclear energy option In addition this knowledge will be of immense value in such diverse fields as radiation therapy and diagnosis and in the space program To achieve the above stated objective the U S Department of Energy DOE and its predecessors embarked upon a fundamental interdisciplinary research program some 35 years ago A critical component of this program is the Radiological and Chemical Physics Program RCPP When the RCPP was established there was very little basic knowledge in the fields of physics chemistry and biology that could be directly applied

to understanding the effects of radiation on biological systems Progress of the RCPP program in its first 15 years was documented in the proceedings of a conference held at Airlie Virginia in 1972 At this conference it was clear that considerable progress had been made in research on the physical and chemical processes in well characterized systems that could be used to understand biological effects During this period of time most physical knowledge was obtained for the gas phase because the technology and instrumentation had not progressed to the point that measurements could be made in liquids more characteristic of biological materials

An Introduction to Chemistry Michael Mosher, Paul Kelter, 2023-03-18

This textbook is written to thoroughly cover the topic of introductory chemistry in detail with specific references to examples of topics in common or everyday life It provides a major overview of topics typically found in first year chemistry courses in the USA The textbook is written in a conversational question based format with a well defined problem solving strategy and presented in a way to encourage readers to think like a chemist and to think outside of the box Numerous examples are presented in every chapter to aid students and provide helpful self learning tools The topics are arranged throughout the textbook in a traditional approach to the subject with the primary audience being undergraduate students and advanced high school students of chemistry

Industrial Hygiene Control of Airborne Chemical Hazards, Second Edition William Pependorf, 2019-06-26

Are you a practicing occupational hygienist wondering how to find a substitute organic solvent that is safer to use than the hazardous one your company is using Chapter 6 is your resource Are you a new hygienist looking for an alternative technology as a nonventilation substitute for an existing hazard Chapter 8 is your resource Are you looking for an overview of ventilation Chapters 10 and 11 are your resource Are you an industrial hygiene student wanting to learn about local exhaust ventilation Chapters 13 through 16 are your resource Are you needing to learn about personal protective equipment and respirators Chapters 21 and 22 are your resources This new edition brings all of these topics and more right up to date with new material in each chapter including new governmental regulations While many of the controls of airborne hazards have their origins in engineering this author has been diligent in explaining concepts writing equations in understandable terms and covering the topics of non ventilation controls both local exhaust and general ventilation and receiver controls at the level needed by most IHs without getting too advanced Taken as a whole this book provides a unique comprehensive tool to learn the challenging yet rewarding role that industrial hygiene can play in controlling airborne chemical hazards at work Most chapters contain a set of practice problems with the solutions available to instructors

Features Written for the novice industrial hygienist but useful to prepare for ABIH certification Explains engineering concepts but requires no prior engineering background Includes specific learning goals that differentiate the depth of learning appropriate to each topic within the fuller information and explanations provided for each chapter Contains updated governmental regulations and abundant references Presents a consistent teaching philosophy and approach throughout the book Deals with both ventilation and non ventilation controls
