Campbell, Richard Hartshorn, 2017 *Assessing Academic Literacy in a Multilingual Society* Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience *Sustainable Design* Tomayess Issa, Pedro Isaias, 2015-10-13 This book is concerned with the importance of Human Computer Interaction HCI Usability user participants and Sustainability in the Information Communication Technology ICT industry throughout the world ICT has become a crucial instrument for communication entertainment commerce and research and this increased usage is presenting new environmental and sustainability issues as we try and meet the ever growing needs of both businesses and individuals Sustainability must become central to the design of new technologies to make a concerted effort to tackle the environmental concerns we face now and for the future Development frameworks tools and models are used and explored and the New Participative Methodology for Sustainable Design NPMSD is introduced as a way of identifying key factors needed in developing more sustainable systems including new smart technology and portable devices It is hoped additional research will be carried out in the future to assess these

sustainable design steps using larger more diverse countries with developed and developing economies to further refine such methods Sustainable Design will be an invaluable resource for students and researchers designers and business managers who are interested in the human centred environmental concerns of sustainable technologies *Everyday Communists in South Africa's Liberation Struggle* Alan Kirkaldy,2021-11-10 This book explores the role of social movements in the Southern African liberation struggle through the lens of two everyday communists Focusing on the Communist Party of South Africa CPSA the author explores the lives of Ivan and Lesley Schermbrucker whose contribution to the party was more clandestine than that of leaders such as Bram Fischer and Joe Slovo They represent how ordinary people could play significant roles based on stances more rooted in common decency and morality than in Marxist theory The book also sheds light on the interplay between transnational and national tendencies during the liberation movement particularly between the 1940s and the 1960s The Schermbruckers changed their views in response to the shifting national and international political landscape the rise of Stalinism and the flight of South African activists into exile from the 1960s Both fluent in African languages they were able to create relationships of trust with African members of the CPSA Examining tensions and conflicts during the liberation struggle this book provides fresh insights into underground activism *Labour Beyond Cosatu* Andries Bezuidenhout, Malehoko Tshoaedi, Christine Bischoff, 2017-07-01 Labour Beyond Cosatu is the fourth volume in the series Taking Democracy Seriously a ground breaking textured and nuanced study on workers and democracy which was established in the 1990s The series looks at members of trade unions affiliated to the Congress of South African Trade Unions Cosatu and provides a rich database of trade union members and research conducted over the past twenty years It is one of the very few such resources available to researchers anywhere in the world Labour Beyond Cosatu paints a complex picture The 12 chapters of the volume explore various rebellions and conflicts in the trade union sector starting with the National Union of Mineworkers NUM and rivalries between Cosatu affiliates Unpacking the conflicts between state sector and private sector workers contributors look at the impact of generational and educational shifts seen by some commentators as proof that Cosatu is now middle class The book also raises the issue of gender in the unions by usefully locating the controversy around charges levelled at Zwelinzima Vavi in 2013 in the larger context of serious problems in the gender politics within parts of Cosatu Refuting the image of a union federation solidly committed to the ANC Labour Beyond Cosatu presents evidence of a sharp decline in support for the ANC within Cosatu and growing scepticism towards the Alliance It shows that attempts to understand the labour movement in South Africa in the future will need to include research of smaller independent unions and social movements The volume's contributors make a major contribution to key debates on labour and democracy providing new material that can potentially shift the discussion in important ways This book will be of great value to students and researchers in Industrial Sociology Political Studies Industrial Psychology and Economics and Management

it showcases women photographers portraying their female contemporaries and analyses to what extent they adhered to or subverted common forms of gender representation In recuperating their forgotten archives the book argues that none of these women are marginal figures but rather that each of them played a leading role in the field of photography in their own time The book will be of interest to scholars working in art history history of photography gender studies intersectionality and African studies **Nigeria-South Africa Relations and Regional Hegemonic Competence** Oluwaseun

Tella,2018-11-27 This book examines the relations between Nigeria and South Africa and their implications for regional influence across the African continent With the largest and third largest economies in the region and a historical status as the major peacemakers on the continent it is often argued that Africa s fate is directly linked to the success or failure of these regional powers While there is widespread reference to each state s capabilities and regional influence in the extant literature little analysis is offered on relations between Nigeria and South Africa and their impact on regional governance and provision of public goods on the continent This book attempts to fill the gap by engaging issues such as the hegemonic competence of the states their credentials for a permanent seat at the UNSC their efforts towards regional integration and their efforts towards combating the dark side of globalization including climate change drug trafficking and xenophobia It also engages a gender perspective to these states relations as well as their experiences of transitional justice Providing an in depth comparative analysis of the two so called African powerhouses this volume will be of interest to policy makers academics and students interested in Nigeria and South Africa s foreign policy regional powerhood and the African peace security and development agenda American Journal of Enology and Viticulture ,2015 *International Impacts on Social Policy* Frank Nullmeier,Delia González de Reufels,Herbert Obinger,2022-02-28 This open access book consists of 39 short essays that exemplify how interactions between inter and trans national interdependencies and domestic factors have shaped the dynamics of social policy in various parts of the world at different points in time Each chapter highlights a specific type of interdependence which has been identified to provide us with a nuanced understanding of specific social policy developments at discrete points in history The volume is divided into four parts that are concerned with a particular type of cross border interrelation The four parts examine the impact on social policy of trade relations and economic crises violence international organisations and cross border communication and migration This book will be of interest to academics and postgraduate students in the field of social policy global history and welfare state research from diverse disciplines sociology political science history law and economics **Decolonising Journalism Education in South Africa** Ms Zubeida Jaffer ,Prof. Ylva Rodny-Gumede ,Dr Mvuso Ponono ,Prof. Colin Chasi ,2021-12-20 With 342 years of colonialism and apartheid in South Africa a book of this calibre is essential to contribute to scholarly debates on the decolonisation of the media After the democratic dispensation in 1994 there was a narrow pursuit of transformation and media freedom while neglecting decolonisation patriarchal tendencies and the plight of black women journalists who are often vilified while discharging their duties It was

two decades after democracy that the RhodesMustFall movement which later evolved into FeesMustFall movement reignited debates on decoloniality in the academia Moreover the book is published during the second wave of FeesMustFall student protests and the demand for decolonised free education is inevitable as no permanent solution to student funding crisis was crafted In the same vein the book advocates for decolonised pedagogy in universities including journalism curriculum That ownership of the media is still skewed towards white and with only few black companies gradually joining the industry also brings into doubt media freedom editorial independence ethics and integrity among media practitioners Therefore the decoloniality movement seeks to confront these structural challenges head on via dialogue to ensure the integrity of the journalism profession Decolonising journalism in South Africa is published at a time in which journalism serves a watchdog and a critique of a democratic government and needs to follow a bottom up social justice approach and become a voice to the voiceless Therefore this book seeks to revolutionise the media in a way that even the language of reporting of certain issues needs to be changed to a balanced kind of reporting characterised by principles of no fear or favour
