

Trimble Geo 7X Handheld

Key Features

Advanced Network Server solution

Continuator accuracy in a bandwidth farm factor

Optimized for Trimble Access field software

Capture high quality photographs and link directly to measured points

Wireless connectivity options include cellular and Wi-Fi technology

The rugged Trimble® Geo 7X handheld with Trimble Access™ software is a complete solution designed to make both high-accuracy surveying and low-effort point measurement easier, more efficient, and more flexible.

TRIMBLE PRODUCTIVITY HANDHELD CONVENIENCE

The Trimble Geo 7X combines the functionality of high-accuracy field work with the flexibility and convenience of handheld positioning in one device.

The Trimble Geo 7X can be used standalone on a survey rod with an external antenna for survey-grade accuracy and when connected to Trimble VRS™ technology, it serves as an advanced and highly productive network rover. Take it off the rack and immediately turn it to its integrated antenna for bandwidth point measurement with easy access to features such as its integrated camera.

Optimized with Trimble Access Software

Trimble Access field software features the power, functionality, and modularity that surveyors need today. It is designed to support everyday work—topographic surveys, staking, control, and more—through a familiar, easy-to-use interface that will ensure your instant productivity—and you'll experience less of the typical downtime associated with learning new software.

Its integrated 3G cellular modem allows continuous network and internet access for web-based services, Trimble VRS corrections, and live, secure synchronization of field and office files through Trimble AccessSync.

In addition, wireless connectivity options including cellular and Wi-Fi technology ensure that field workers can remain in contact with the office and each other, even from remote locations.

The Trimble Geo 7X comes with Microsoft® Windows® Embedded Handheld version 6.5 Professional operating system, making it easy to use standard office documents in the field.

Continuator Accuracy in Your Hand

On the survey rod or in your hand, the Trimble Geo 7X delivers the accuracy and speed required to ensure that the work of recording survey points or staking-out is fast and reliable.

The Geo 7X supports signals from all existing and planned GNSS constellations and augmentation systems. In addition to being a complete network rover solution, when outside the network, the system can be used to collect GNSS data for postprocessing in Trimble Business Center software. Trimble delivers business confidence with a sound GNSS investment for today and long into the future.

Eliminate Physical Barriers to Field Success

For times when occupying the position is simply not possible due to dangerous conditions or right-of-way challenges, utilize the detachable Geo 7X singlerodder accuracy. Measurements integrate directly into Trimble data collection software—simply point and shoot to get the position—even where there are obstacles such as traffic or private land access limitations.

Photographs and Geotagging in the Field

Adding in capturing information about an asset, event, or object. The Geo 7X includes a 5-megapixel autofocus camera with geotagging capability. The camera is controlled by the Trimble Access software, so photo capture and linking of images to survey data is seamless and simple to integrate with existing workflows.

Designed for High Efficiency Work

The Trimble Geo 7X is fully rugged with an IP68 rating for dust and water, and MIL-STD-883C testing for drops, shocks, vibration, temperature, altitude and humidity.

The Trimble Geo 7X with Trimble Access software and sensors, together with Trimble VRS technology and Trimble Business Center software, is an optimal solution for surveyors facing a variety of work requirements.
