When Political Transitions Work Fanie du Toit, 2018-07-26 The peaceful end of apartheid in South Africa was a monumental event in late twentieth century history A racist regime built upon a foundation of colonialist exploitation South Africa had become by that point a tinderbox suffused with day to day violence and political extremism on all sides Yet two decades later it was a stable democracy with a growing economy How did such a deeply divided conflicted society manage this remarkable transition In When Political Transitions Work Fanie du Toit who has been a participant and close observer in post conflict developments throughout Africa for decades offers a new theory for why South Africa s reconciliation worked and why its lessons remain relevant for other nations emerging from civil conflicts He uses reconciliation as a framework for political transition and seeks to answer three key questions how do the reconciliation processes begin how can political transitions result in inclusive and fair institutional change and to what extent does reconciliation change the way a society functions Looking at South Africa one of reconciliation s most celebrated cases Du Toit shows that the key ingredient to successful reconciliations is acknowledging the centrality of relationships He further develops his own theoretical approach to reconciliation as interdependence the idea that reconciliation is the result of an integrated process of courageous leadership fair and inclusive institutions and social change built toward a mutual goal of prosperity As Du Toit conveys the

motivation for reconciliation is the long term well being of one's own community as well as that of enemy groups Without ensuring the conditions in which one's enemy can flourish one's own community is unlikely to prosper sustainably

State Formation After Civil War Derek M Powell, 2016-08-05 *State formation after civil war* offers a new model for studying the formation of the state in a national peace transition as an integrated national phenomenon Current models of peacebuilding and state building limit that possibility reproducing a fragmented selective view of this complex reality Placing too much emphasis on state building as design they place too little on understanding state formation as unplanned historical process The dominant focus on national institutions also ignores the role that cities and civic polities have played in constituting the modern state Mining ideas from many disciplines and evidence from 19 peace processes including South Africa the book argues that the starting point for building a systematic theory is to explain a distinct pattern to state formation that can be observed in practice Despite their conflicts people in fragile societies bargain terms for peaceful coexistence they make attempts to constitute the

right to rule as valid state authority in circumstances prone to conflict over which they have imperfect influence not control. Though the kind of institutions created will differ with context, how rules for state authority are institutionalized follows a consistent basic pattern. That pattern defines state formation in peace transitions as both a unified if contingent field of normative practice and an object of comparative study. Where the national centric models see local government as a matter belonging to policy on decentralization for later in the reconstruction phase, the book uncovers a distinct local government dimension to peace transitions. A civic dimension to national conflicts that must be explained incipient or proto local authorities that emerge even during civil war in peace making after state collapse, the fact that it is common for peace agreements and constitutions to include rules for local authority for local elections to be held as part of broader democratization and for laws to be enacted to establish local government as part of peace compacts. The book develops the concept of local peace transition to explain the distinctive constitutive role of this local dimension in peace making and state formation. This path breaking book will be of compelling interest to practitioners, scholars and students of comparative constitutional studies, international law, peace building and state building.
