Mpumalanga September 2014 Paper Life Science:

Infrastructures for Peace in Sub-Saharan Africa Mediel Hove, Geoff Harris, 2019-06-14 Cultures of violence are characteristic of many countries in sub Saharan Africa and attempts to move towards cultures of peace have often proved difficult and ineffectual And yet the wide variations in levels of violence within and between countries show that it is not inevitable rather it is the result of choices made at individual community and societal levels This book examines the potential of peace infrastructures as vehicles to strengthen and spread progress towards cultures of peace Peace infrastructures vary hugely in sophistication and level The examples examined in this book range from tiny structures which help resolve conflicts between individuals and within community organisations peace committees which serve local communities peace education and peace club programmes in schools mediation mechanisms to prevent election violence and to ministries of peace to coordinate government and non government efforts in peacemaking and peacebuilding The overall finding is that the development of peace infrastructures at all levels has great potential to build cultures of peace 1 It is the only book available which documents the experience and potential of nonviolence in post independence sub Saharan Africa 2 It makes a persuasive case for the development of various peace infrastructures in order to make peace sustainable 3 It explains how strategic planning can be utilised both to bring about change and to institutionalise it No Last Place to Rest Dineo Skosana, 2025-02 No Last Place to Rest Coal Mining and Dispossession in South Africa is an exploration of the ongoing struggles faced by families whose lives have been upended by the relentless expansion of coal mining operations in the Mpumalanga and KwaZulu Natal provinces These regions burdened with the task of fulfilling the nation's energy needs and boosting the country's economy witness daily the harsh realities of land dispossession that extend far beyond the mere loss of property Dineo Skosana presents a compelling argument that dispossession remains a present day reality and crisis contradicting the notion that it is merely a relic of the past in the post apartheid landscape She challenges the narrow perspective that measures land loss in material and economic terms only By considering the impact of grave relocations a common occurrence in these mining dominated locales she demonstrates the profound spiritual anguish and dehumanisation communities endure as their lands are excavated and families lose their sacred connections with their ancestors Skosana argues that the act of dispossession of both the living and the dead from their land wounds the collective soul of a people eroding their cultural heritage collective identity and sense of belonging This book offers a rich ethnographic account of the experiences struggles and resistance of the affected communities as well as a critical analysis of the legal and policy frameworks that enable their exploitation In relation to the land question in South Africa No Last Place to Rest presents deep insights for communities activists and government sectors acting in support of social justice and redress Public Secrets and Private Sufferings in the South African AIDS Epidemic Jonathan Stadler, 2021-04-26 This book tells the story of the HIV epidemic in South Africa and asks why after more than three decades it has not normalised Despite considerable efforts to

prevent infection and ambitious targets set to end the epidemic by 2030 HIV infections are increasing among young women and treatment uptake and adherence have been uneven Focusing on the years preceding and following treatment access this book addresses why an end to AIDS may be misplaced optimism By examining public discourses and private narratives about infection illness and death this work reveals the contradictions between the lived experiences of AIDS suffering on the one hand and biomedical certainties on the other Based on long term ethnographic research in rural villages of the South African lowveld and within HIV prevention interventions in South Africa more generally this book offers an intimate perspective on the social and cultural responses to the epidemic

The Palgrave Handbook of Urban Development Planning in Africa Meleckidzedek Khayesi, Francis Nyongesa Wegulo, 2022-11-25 Where can one get a synthesis of research findings on urban development planning in Africa This book addresses this gap in knowledge by distilling existing research to provide insights into theories research designs empirical findings and approaches on urban development planning in Africa Starting with the overall planning culture and strategies the book chapters move on to specific themes such as governance population poverty water recreation transport agriculture air quality and rural urban linkages This book reduces the prevailing risk of unnecessary duplication of research and the inadequate attention that is being given to extending research in new areas This situation has partly been due to existing research remaining scattered in different organizations and publications and has not been subjected to critical synthesis to unearth any new developments that it contains The book makes available research findings to be utilized in current and future urban development planning in Africa
