Quality and Risk Management in the IVF Laboratory Sharon T. Mortimer, David Mortimer, 2015-03-02 Public concern over high profile mistakes in IVF clinics and the concomitant increase in governmental regulation have given rise to widespread recognition of the need for accreditation of IVF clinics Modern accreditation schemes are largely based on the

principles of ISO 9001 and related standards at the heart of which lies the expectation of a formal quality management system Risk analysis and risk minimization are also being demanded of IVF clinics but many only have limited understanding of how to approach these essential management tasks This book brings together the basics of quality management and risk management focussing on prophylactic management prevention rather than cure Each chapter in this new edition is fully updated and extended to include new material such as quality and risk management in the ART clinic and an illustrative example of a well run clinic This is the essential guide for clinicians and IVF laboratory staff **Systems Approach to Engineering Design** P. H. Sydenham,2004 As high tech engineering organizations learn to do more with less they are relying more and more on the efforts of individual designers and small design teams Combined with this trend is the growing popularity of systems engineering techniques to tackle ever increasing complex system designs This book empowers small teams with systems engineering techniques that once were the exclusive domain of large organizations employing hundreds of engineers to develop complex tightly integrated systems designs This timely resource explains how engineers leading a small design team can use systems thinking to manage and optimize design and development as well as how to become effective leaders of a small team
