

# Organelles in Eukaryotic Cells

What are the functions of different organelles in a cell?

## Why?

The cell is the basic unit and building block of all living things. Organisms rely on their cells to perform all necessary functions of life. Certain functions are carried out within different structures of the cell. These structures are called **organelles**.

## Model 1 – How Is a Cell Like a Factory?

| Part of factory                   | Cell organelle             | Function  |
|-----------------------------------|----------------------------|---|
| Control room (E)                  | Nucleus                    | Contains and protects genetic material (DNA)                    |
| Factory manager                   | DNA/chromosomes            | Information for making proteins                                 |
| Assembly workers (F)              | Ribosomes                  | Make proteins   |
