Essay and Short Answer

What are the three main components of a nucleosome and how are they connected?

The nucleosome is the basic unit of chromatin organization. It consists of a DNA double helix wrapped around a core of histone proteins. The core is composed of two molecules of histone H2A and H2B, and two molecules of histone H3 and H4. The DNA is connected to the core by histone tails.

The histone tails are rich in positively charged amino acids, which interact with the negatively charged phosphate groups of the DNA backbone. This interaction helps to stabilize the nucleosome structure.
