presents chapters from diverse range of authors on different aspects of how Blockchain and IoT are converging and the impacts of these developments The book provides an extensive cross sectional and multi disciplinary look into this trend and how it affects artificial intelligence cyber physical systems and robotics with a look at applications in aerospace agriculture automotive critical infrastructures healthcare manufacturing retail smart transport systems smart cities and smart healthcare Cases include the impact of Blockchain for IoT Security decentralized access control systems in IoT Blockchain architecture for scalable access management in IoT smart and sustainable IoT applications incorporating Blockchain and more The book presents contributions from international academics researchers and practitioners from diverse perspectives Presents how Blockchain and IoT are converging and the impacts of these developments on technology and its application Discusses IoT and Blockchain from cross sectional and multi disciplinary perspectives Includes contributions from researchers academics and professionals from around the world

Cooperative and Distributed Intelligent

Computation in Fog Computing Hoa Tran-Dang,Dong-Seong Kim,2023-06-22 This informative text reference presents a detailed review of the state of the art in fog computing paradigm In particular the book examines a broad range of important cooperative and distributed computation algorithms along with their design objectives and technical challenges The coverage includes the conceptual fundamental of fog computing its practical applications cooperative and distributed computation algorithms using optimization swarm intelligence matching theory and reinforcement learning methods Discussions are also provided on remaining challenges and open research issues for designing and developing the efficient distributed computation solutions in the next generation of fog enabled IoT systems

Fundamentals of Computer Networks Matthew N. O. Sadiku,Cajetan M. Akujuobi,2022-08-29 This textbook presents computer networks to electrical and computer engineering students in a manner that is clearer more interesting and easier to understand than other texts All principles are presented in a lucid logical step by step manner As much as possible the authors avoid wordiness and giving too much detail that could hide concepts and impede overall understanding of the material Ten review questions in the form of multiple choice objective items are provided at the end of each chapter with answers The review questions are intended to cover the little tricks which the examples and end of chapter problems may not cover They serve as a self test device and help students determine how well they have mastered the chapter
