FILM SUMMARY

FOOD, INC. takes the viewer on a journey, not through the bustling and often-busy landscape of industrial food-production in the U.S. The film takes instead food on the wider range of issues most often don't consider: manipulating food-shopping at the local grocery store as anything more than a business transaction. From factory farms and slaughterhouses where animals are raised under conditions and treated with antibiotics and other pharmaceuticals every day, (antibiotic resistance affects us consumers in the long-term, negative working conditions for environmental workers in food processing plants, **FOOD, INC.** will open your eyes and help you connect.

Leading us on this journey are two of the most well-informed and intriguing writers on the subject: Eric Schlosser (of *Fast Food Nation* and *Richard Potters* (the director/director). They provide a revealing and unsettling account of a food supply system heavily subsidized and protected by government policies, exposing almost no accountability or regulation. Food safety is regulated by the FDA. The film also explores the growing epidemic of obesity, especially the increasing demand for organic, antibiotic-free and foods. (Antibiotic resistance is a vital issue, **FOOD, INC.** shows the high costs of cheap food and how the system is designed to demand better.
