Gorzycki,2020-12-16 If the coronavirus does not get us our ignorance might The COVID 19 pandemic exposed serious gaps in Americans education Did education cause the outbreak No Did our assumptions false narratives about the world and our willingness to blindly accept whatever our partisan poohbahs said contribute to our woes Perhaps Could education be improved so we can better understand the world nature public health economics and our own government Absolutely During the pandemic thousands of teachers flocked to the silicon sanctuary as shelter in place mandates forced schools and universities into the digital classroom Instructors urgently wanted to know which boxes to click in their learning management systems The how to literature proliferated and much of it walked a fine line between reasonable adjustments and outright abdication of high standards of academic achievement and intellectual development A case is made here that education was in trouble long before COVID 19 appeared and that if we do not make substantial reforms in our schools and colleges whether online or not we will be at the mercy of our own ignorance as the problems of the twenty first century crash into our lives
