of horsepower All of the Detroit manufacturers had their versions of big block engines and Ford was no exception Actually Ford was somewhat unique in that it had two very different big block engine designs during the muscle car era The FE engine was a design pioneered in the late 1950s primarily as a more powerful replacement for the dated Y block design because cars were becoming bigger and heavier and therefore necessitated more power to move What started as torquey engines meant to move heavyweight sedans morphed into screaming high performance mills that won Le Mans and drag racing championships through the 1960s By the late 1960s the design was dated so Ford replaced the FE design with the 385 series also known as the Lima design which was more similar to the canted valve Cleveland design being pioneered at the same time It didn't share the 1960s pedigree of racing success but the new design was better in almost every way it exists via Ford motorsports offerings to this day In Ford Big Block Parts Interchange Ford expert and historian George Reid covers both engines completely Interchange and availability for all engine components are covered including cranks rods pistons camshafts engine blocks intake and exhaust manifolds carburetors distributors and more Expanding from the previous edition of High Performance Ford Parts Interchange that covered both small and big block engines in one volume this book cuts out the small block information and devotes every page to the FE Series and 385 big blocks from Ford which allows for more complete and extensive coverage p p1 margin 0 0px 0 0px 0 0px 0 0px font 12 0px Arial

Ford Police Cars, 1932-1997 Edwin J. Sanow, This book offers tremendous detail about the Ford models used by law enforcement agencies between 1932 and today The book highlights special police equipment such

as heavy duty suspensions and transmissions high performance engines and special interiors *Full-Size Ford Restoration: 1960-1964* Collin Kleer, 2017-08-15 Ford's full size model change from 1959 to 1960 was seen as a big departure from the swerving lines of the 1950s. Slow to start on sales, Ford's full size production grew year after year peaking with 648,010 units produced in 1963. It was an all time best for the Galaxie line and its sister nameplates. Eight appearance and performance offerings were applied to the full size Ford line including the Fairlane, Galaxie, Ranch Wagon, Country Sedan, Country Squire, Courier 300 and Custom which made each car unique. With more than 2.3 million full size Fords produced from 1960 to 1964, a restoration book for these cars has been desperately needed and here it is. Author Colin Kleer, president of Pennsylvania's Three Rivers chapter of the Galaxie Club, puts his decades of experience restoring these cars into this single volume. Featuring step by step procedures on body, driveline, chassis and interior components, Kleer shows with more than 400 photos and text how to restore a full size Ford to its former glory. Crucial projects such as rust repair and driveline maintenance help guarantee that your Ford will be sound and solid for years to come after the restoration. The Galaxie and its full size stablemates continue to be a strong force at car shows and in the marketplace they create an even deeper following for these cars. Adding a detailed restoration book to the full size restorers arsenal will surely aid in bringing more of these Fords back to life and back on the road.
