Bonsall, 2004

Lincoln's heritage is as rich as that of any car built anywhere in the world and more impressive than all but a few. Generations of Americans have known it as the Car of Presidents since the days of Franklin Roosevelt. The White House has exhibited a marked preference for Lincolns. This comprehensive illustrated history describes in detail the successes and failures of the Lincoln from World War II up to the present day. Aviator It discusses the forces in the market and in Ford Motor Company that have affected the Lincoln and is a must read for anyone interested in this classic marque.

The Cadillac Story Thomas E. Bonsall, 2004 The Cadillac story is more than the story of a car company. It is in many ways the story of the American automobile industry itself which as much as any industry drove America's growth in the twentieth century and defined who we are as a people. For generations of Americans Cadillac epitomized expansive prosperity. This illustrated history of Cadillac presents all the triumphs and failures of the marque's last sixty years from the good times through the disastrous 1980s and up to the current reconstitution of the brand.

Corporate Climate Action, Transnational Politics, and World Order Charlotte Hulme, 2023-07-25 This book explores the origins and significance of the corporate climate action phenomenon which has attracted increased attention in recent years. It examines how and why during the 2010s American, German and Indian corporations spanning finance, technology, automotive and energy intensive industries adopted certain climate practices and converged around the idea that the private sector has a vital role to play in addressing climate change and advancing a low carbon future. It also considers how policy developments that states widely understood as watersheds including the 2015 Paris Climate Agreement simply confirmed what the private sector had long believed that states lacked answers about how to achieve concerted, ambitious and effective climate action. It was in this context amid diminishing expectations for robust state climate action that select corporations sought to fill a perceived leadership vacuum in an issue area poised to shape future global trends. Providing a novel assessment of the corporate sector as a climate actor, this book evaluates how the shift in the center of gravity in the climate change issue area away from national governments and toward other players may influence world order and impact an international security landscape increasingly defined by non-military challenges.

Financialisation in the Automotive Industry Marcelo José do Carmo, Mário Sacomano Neto, Julio Cesar Donadone, 2021-07-08 Where presidents or members of affluent families were previously seen, it is increasingly the case that car manufacturers are owned by banks and investment funds which have taken control of the entire economic life of these firms. This has significant impact on the terms of employment and layoffs, wages and precarious work, growing inequalities in income strata, compensation levels for executives and the implementation of short-termist strategies across business operations. This book explores this increasing financialisation, the predominance of the financial sector over the productive sector in the automotive industry. In particular, it is shown that the financial operations of these companies through leasing, insurance, loans and other financial instruments is now much more profitable than the manufacturing aspects of the business which was originally the *raison d'être* for these firms. The chapters demonstrate how there are great demands

to increase the return to shareholders as a main concern despite other metrics and or other stakeholders The work studies the impact of financialisation at the world s five largest automakers which together represent almost 50% of car production providing an exploratory analysis of profitability shareholder composition compensation to executives workers salaries dividend payments to shareholders and employment Encouraging debate on contemporary economy this book marks a significant addition to the literature on financialisation contemporary forms of capitalism labour and economic sociology more broadly

Borrow Louis Hyman,2012-01-24 In this lively history of consumer debt in America economic historian Louis Hyman demonstrates that today s problems are not as new as we think Borrow examines how the rise of consumer borrowing virtually unknown before the twentieth century has altered our culture and economy Starting in the years before the Great Depression increased access to money raised living standards but also introduced unforeseen risks As lending grew more and more profitable it displaced funds available for business borrowing setting our economy on an unsustainable course Told through the vivid stories of individuals and institutions affected by these changes Borrow charts the collision of commerce and culture in twentieth century America giving an historical perspective on what is new and what is not in today s economic turmoil A Paperback Original

Ford and the Global Strategies of Multinationals Maria Isabel Studer Noguez,2003-08-27 Today the Multinational Enterprise MNE is seen as a leading agent in the process of globalization As they adopt global strategies MNE s are seen to be creating stronger deeper and more lasting links amongst countries thus shifting the balance of power inexorably in their favour to the detriment of the state This book interrogates this idea by undertaking a historical analysis of the global strategies of Ford

Research and Relevant Knowledge Roger L. Geiger,2017-09-29 The rise of American research universities to international preeminence constitutes one of the most important episodes in the history of higher education Research and Relevant Knowledge follows Geiger s earlier volume on American research universities from 1900 to 1940 This second work is the first study to trace this momentous development in the post World War II period It describes how the federal government first relied on university scientists during the war and how the resulting relationship set the pattern for the postwar mushrooming of academic research The first half of the book analyzes the development of the postwar system of academic research exploring the contributions of foundations defense agencies and universities The second half depicts the rise of the golden age of academic research in the years after Sputnik 1957 and its eventual dissolution at the end of the 1960s graduate education When the federal patron soon reduced its largesse

university students took the lead in challenging the putative hegemony of academic research. The loss of consensus quickly brought the malaise of the 1970s: stagnation, frustration, and equivocation about the research role. The final chapter appraises the renaissance of the 1980s based largely on a rapprochement with the private sector and ends by evaluating the embattled status of research universities at the beginning of the 1990s. *Research and Relevant Knowledge* provides the first authoritative analytical account of American research universities during their most fateful half century. It will be of critical importance to all those concerned with the future of higher education in the United States.

The Public Image of Henry Ford David Lanier Lewis, 1976 Skillful journalism and meticulous scholarship are combined in the full-bodied portrait of that enigmatic folk hero Henry Ford and of the company he built from scratch. Writing with verve and objectivity, David Lewis focuses on the fame, popularity, and influence of America's most unconventional businessman and traces the history of public relations and advertising within Ford Motor Company and the automobile industry.
