Performance Parallelism Pearls Volume 2 offers another set of examples that demonstrate how to leverage parallelism. Similar to Volume 1, the techniques included here explain how to use processors and coprocessors with the same programming, illustrating the most effective ways to combine Xeon Phi coprocessors with Xeon and other multicore processors. The book includes examples of successful programming efforts drawn from across industries and domains such as biomed, genetics, finance, manufacturing, imaging, and more. Each chapter in this edited work includes detailed explanations of the programming techniques used while showing high performance results on both Intel Xeon Phi coprocessors and multicore processors. Learn from dozens of new examples and case studies illustrating success stories demonstrating not just the features of Xeon-powered systems but also how to leverage parallelism across these heterogeneous systems. Promotes write once, run anywhere coding, showing how to code for high performance on multicore processors and Xeon Phi. Examples from multiple vertical domains illustrating real-world use of Xeon Phi coprocessors. Source code available for download to facilitate further exploration.

Taste and Odour in Source and Drinking Water Tsair-Fuh Lin, Sue Watson, I. H. (Mel) Suffet, 2018-03-15. This book provides an updated evaluation of the characterization and management of taste and odour (T O) in source and drinking waters. Authored by international experts from the IWA Specialist Group on Off-flavours in the Aquatic Environment, the book represents an important resource that synthesizes current knowledge on the origins, mitigation, and management of aquatic T O problems. The material provides new knowledge for an increasing widespread degradation of source waters and global demand for high quality potable water. Key topics include early warning detection and source tracking, chemical sensory and molecular diagnosis, treatment options for common odorants and minerals, source management, modelling, and risk assessment, and future research directions. *Taste and Odour in Source and Drinking Water* is directed towards a wide readership of scientists, engineers, technical operators, and managers and presents both practical and theoretical material, including an updated version of the benchmark Drinking Water Taste and Odour Wheel and a new biological wheel to provide a practical and informative tool for the initial diagnosis of the chemical and biological sources of aquatic T O.
