OBJECTIVE

NOTE: You have four choices for each objective type question as A, B, C and D. The choice which you think is correct, fill that circle in front of that question number. Use marker or pen to fill the circles. Cutting or filling two or more circles will result in zero mark in that question.

QUESTION NO. 1

	When dielectric material is placed in an electric field it (A) conducts (B) exhibit electric charge (C) undergoes electrolysis (D) becomes po	larized
	(A) R/C (B) C/R (C) R x C (D) \(\subseteq \text{RC} \) Equivalent resistance when two resistances are connected in parallel is given by	
	(A) $R_1 + R_2$ (B) $R_1 + R_2$ (C) R_1R_2 (D) R_1R_2	
- 1	R_1R_2 $R_1 + R_2$ $R_1 - R_2$	
	When Ohm meter measures infinite resistance, its pointer lies at	
- 1	(A) Centre of scale (B) Left end of scale (C) Right end of scale (D) Out of scale	
	A proper combination of a galvanometer and a series resistance acts as	
1	(A) Olum meter (B) Volt meter (C) Ammeter (D) Potentiometer A transformer	
- 1	(A) transformers power (B) generates emf (C) transforms voltage (D) transforms en	erev
- 1	When a motor is just started, the back emf is	
- 1	(A) maximum (B) minimum (C) infinity (D) Almost zero	
	In D.C circuits, current and voltage are controlled by (A) capacitor (B) inductor (C) Resistor (D) gate	
. 1	The reactance x _c of capacitor is given by	
- 1	(A) $x_c = 2\pi fc$ (B) $x_c = \pi fc$ (C) $x_c = 1$ (D) $x_c = 1$	
- 1	2 π fc 2 π f	
0	Semiconductor resistivity ranges	
	(A) 10 ⁻⁶ to 10 ⁻⁴ (B) 10 ⁶ to 10 ⁴ (C) 10 ⁻⁶ to 10 ⁻⁸ (D) 10 ⁻⁸ to 10 ⁻¹⁰	
1	The mathematical symbol for NOR operation is	
2	(A) $x = A.B$ (B) $x = \overline{A.B}$ (C) $x = A+B$ (D) $x = \overline{A+B}$ Emitter current IE in transistor is given by	
	(A) IE = IC/IB (B) IE = IB/IC (C) IE = IB + IC (D) IE = IC - IB	
3	(A) $IE = IC/IB$ (B) $IE = IB/IC$ (C) $IE = IB + IC$ (D) $IE = IC - IB$ The condition $hf > 2 moc^2$ refers to	
_ 1	(A) Compton effect (B) pair production (C) Photoelectric effect (D) Annihilation	of man
•	Momentum of photon is	
5	(A) h/c (B) c/h (C) hf/c (D) λ/h	
	An atom can reside in excited state for (A) 10 ⁻⁸ Sec (B) one second (C) 10 ⁻³ Sec (D) 10 ⁻¹⁰ Sec	
- 1	The SI unit of radiation dose is	
5	(A) Roentgen (B) Curie (C) Grey (D) Rem	
7	The particles equal in mass or greater than protons are called	
-	(A) leptons (B) baryons (C) mesons (D) muons	
>-	EFCS - GROUP SECOND 12*CLASS - 120(13) TIME - 2.4 MAPPES MAPPES	OHOLR
	SUBJECTIVE SECTION NO. 2 Write short answers a ny Eight (8) questions of the following (1) Give statement of Gauss's law. Write down it's mathematical form	68
	(1) Give statement of Gauss's law. Write down it's mathematical form (2) How can you identify that which plate of a capacitor is positively charged (3) Electric lines of forces never cross why? (4) Define electron volt and sho v that 1 ev = 1.6 x 10 ⁻¹⁹ J (5) How can you use magnetic field to separate the isotopes of a chemical element?	
	 (3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10⁻¹⁹ J 	ar a shem "
	 (3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10⁻¹⁹ I (5) How can you use magnetic field to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O. (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged particles are projected into a region where there is a magnetic field perpendicul to their velocities. If the charged deflected in opposite directions. What can you say about the following states and Ler's law and Ler's law and Ler's law same units. (10) Show that £ and Δ Φ/Δ have same units. (11) A suspended magnet is oscillating freely in a horizontal plane. The oscillation are strongly divided an ental plate is places under the magnet. Explain why this occur 	ar n thems " amped
TES.	 (3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10⁻¹⁹ I (5) How can you use magnetic field to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O. (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged particles are projected into a region where there is a magnetic field perpendicul to their velocities. If the charged deflected in opposite directions. What can you say about the following states and Ler's law and Ler's law and Ler's law same units. (10) Show that £ and Δ Φ/Δ have same units. (11) A suspended magnet is oscillating freely in a horizontal plane. The oscillation are strongly divided an ental plate is places under the magnet. Explain why this occur 	ar at thems * amsped
ES	 (3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10⁻¹⁹ I (5) How can you use magnetic field to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O. (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged particles are projected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions. What can you say about their velocities are projected in the control of the charges are deflected in opposite directions. What can you say about Show that £ and Δ Φ/Δ have same units. (10) Show that £ and Δ Φ/Δ have same units. (11) A suspended magnet is oscillating freely in a horizontal plane. The oscillation are strongly divided a metal plate is places under the magnet. Explain why this occur (12) How can the power losses by minimized in a transformer (13) Write short answers any Eight (8) questions of the following (14) De hends in a wire affect its electric resistance? Evolution 	
ES	 (3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10⁻¹⁹ I (5) How can you use magnetic feld to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O. (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged particles are prejected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions, What can you say about their velocities are prejected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions, What can you say about their velocities is and Ler's law. (10) Show that £ and Δ Φ/Δ have same units. (11) A suspended magnet is oscillating freely in a horizontal plane. The oscillation are strongly dividen a metal plate is places under the magnet. Explain why this occur how can the power losses by minimized in a transformer (110) No.3 Write short answers any Eight (8) questions of the following. (12) Obsends in a wire affect its electric resistance? Explain Why does the resistance of a conductor rise with temperature? (3) Give the colour code 	
ES	(3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10 ⁻¹⁰ J (5) How can you use magnetic field to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged particles are projected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions, What can you say about State Faraday's law and Lerz's law. (10) Show that £ and \$\int O/AT\$ have same units. (11) A suspended magnet is oscillating freely in a horizontal plane. The oscillation are strongly defined in the power leplaces under the magnet. Explain why this occur. (12) How can the power leplaces under the magnet. Explain why this occur. (13) Ob bends in a wire affect its electric resistance? Explain (24) Give any two properties of parallel resonant circuit.	
ES	(3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10 ⁻¹⁰ J (5) How can you use magnetic field to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged particles are projected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions. What can you say about the control of the control of their velocities in the charges are deflected in opposite directions. What can you say about the control of their velocities is obtained in a horizontal plane. The oscillation are strongly divided by the control of the control of the magnet. Explain why this occur when a metal plane is placed under the magnet. Explain why this occur how can the power losses by minimized in a transformer. (12) No. 3. Write short answers my Eight (8) questions of the following: (2) Why does the resistance of a conductor rise with temperature? (3) Object in a wire affect its electric resistance? Explain why this control of the colour code is conductor rise with temperature? (4) Office the colour code is conductor rise with temperature? (5) Define impredance. Give its unit	
ES	(3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10 ⁻¹⁰ J (5) How can you use magnetic field to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged particles are prejected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions. What can you say about the control of the control of their velocities. If the charges are deflected in opposite directions. What can you say about the control of their velocities is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions. What can you say about the first selection of the control of the control of the control of their velocities. If the charges are deflected in opposite directions. What can you say about the first selection of the control of th	
JES	(3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10 ⁻¹⁰ I (5) How can you use magnetic feld to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged particles are projected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions, What can you say about State Farnday's law and Lerz's law. (10) Show that £ and \(\Delta \frac{\pi}{\sigma \Delta \Times \Delta \frac{\pi}{\sigma \Delta \Times \Delta \Del

Give its unit (16) How many times per second will an incandescent lamp reach maximum brilliance when connected to a 50 Hz source? (16) Define crystal lattice What are ductile and brittle substance? What is coercirity? Give the truth tables of NA ND or NOR gates (16) Make the circuit diagram or OP-amp as inverting amplifier and as night switch	16
	(3) Electric lines of forces never cross why? (4) Define electron voit and sho v that I ev = 1.6 x 10 ⁻¹⁹ I (5) How can you use magnetic f eld to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) Two charged particles are projected into a region where there is a magnetic field perpendicul response to the role of electric and magnetic force in this regard? (8) State Farnday's law and Let 2's law. (9) State Farnday's law and Let 2's law. (11) A suspended magnet is oscillating freely in a horizontal plane. The oscillation are strongly defected where a metal plate is place under the magnet. Explain why this occur. (12) How can the power losses be minimized in a transformer. (13) Write short answers in y Eight (8) questions of the following. (14) Dends in a wire affect its electric resistance? Explain (15) Dends in a wire affect its electric resistance? Explain (16) Give any two properties of parallel resonant circuit. (17) Define impedance. Give its unit. (18) How many times per secon! will an incandescent lamp reach maximum brilliance when connected to a 50 Ftz source? (19) Give the truth tables of NA ND or NOR gates. (10) Give the truth tables of NA ND or NOR gates. (11) Make the circuit diagram or OP-amp as inverting amplifier and as night switch. (12) What is the principle of virtual ground? Explain (13) What is the Principle of virtual ground? Explain (14) What is the Principle of virtual ground? Explain (15) What is the Principle of virtual ground? Explain (16) What is the Principle of virtual ground? Explain (17) What is de-Broglie waveler gth? (18) Whet is the principle of virtual ground? Explain transformer to make the circuit ground and the principle of the principle of the principle of principle	16
	(3) Electric lines of forces never cross why? (4) Define electron volt and sho v that 1 ev = 1.6 x 10 ⁻¹⁹ J (5) How can you use magnetic field to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O. (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) The control of the color of electric and magnetic force in this regard? (8) The color of the color of electric and magnetic force in this regard? (9) State Faraday's law and Ler 2's law. (10) Show that E and A O/AC have same units. (11) A suspended magnet is oscillating freely in a horizontal plane. The oscillation are strongly deviced a metal plane is places under the magnet. Explain why this occur (11) When a metal plane is places under the magnet. Explain why this occur (12) Why does the resistance of the conductor rise with temperature? (13) Obtained in a wire affect its electric resistance? Explain (14) Why does the resistance of parallel resonant circuit (15) How many times per secon! will an incandescent lamp reach maximum brilliance when connected to a 50 Hz source? (16) Unforce crystal lattice (17) What is ecceptive? (18) What are ductile and brittle substance? (19) What is coverify? (20) What is coverify? (31) What is the principle of virtual ground? Explain (32) What is the principle of virtual ground? Explain (33) What is the principle of virtual ground? Explain (44) What is the principle of virtual ground? Explain (55) What is the principle of virtual ground? Explain (56) What is the principle of virtual ground? Explain (57) What is the principle of virtual ground? Explain (58) What is the principle of virtual ground? Explain (59) What is the principle of virtual ground? Explain (60) What is the principle of virtual ground? Explain (70) What is de-Broglie waveler; the prominent transferred to metal surface (71) What is the electron of the principle of virtual ground? Explain (72) Will higher frequency light eject greater number o	16
	(3) Electric lines of forces newer cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10 ⁻¹⁹ J (5) How can you use magnetic f eld to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O. (7) What is Lorentz force? Give the role of electric and magnetic force in this regard? (8) The property of the properties of the role of electric and magnetic force in this regard? (8) The property of the properties of the role of electric and magnetic force in this regard? (8) The properties of the properties of the properties of electric and magnetic force in this regard? (9) State Farnday's law and Let z's law. (10) Show that £ and \$\Delta \Quad \Quad \Quad \Quad	16
	(3) Electric lines of forces never cross why? (4) Define electron volt and sho v that 1 ev = 1.6 x 10 ⁻¹⁰ J (5) How can you use magnetic f eld to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in C.R.O (7) What is Lerentz force? Give the role of electric and magnetic force in this regard? (8) To their velocities. If the charges are deflected in opposite directions what can you say about their velocities. If the charges are deflected in opposite directions. What can you say about the following state Faraday's law and Ler z's law. (10) State Faraday's law and Ler z's law. (11) A suspended magnet is oscillating freely in a horizontal plane. The oscillation are strongly defined to their velocities to estimate the same units. (12) How can the power losses be minimized in a transformer of the power losses be minimized in a transformer of the power losses be minimized in a transformer of the following of the colour code of the code of t	16
	(3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10 ⁻¹⁹ I (5) How can you use magnetic field to separate the isotopes of a chemical element? (6) Briefly give the function of cathode and Grid in CRO genetic force in this regard? (7) Briefly give the function of cathode and Grid in CRO genetic force in this regard? (8) Two charged particles are projected into a region where there is a magnetic field perpendicul to their velocities. If the charges are deflected in opposite directions. What can you say about their velocities. If the charges are deflected in opposite directions, what can you say about their velocities. If the charges are deflected in opposite directions, what can you say about the project of the color of the color of the following of the color	16
ES	(3) Electric lines of forces never cross why? (4) Define electron volt and sho v that I ev = 1.6 x 10 ⁻¹⁹ I (5) How can you use magnetic field to separate the isotopes of a chemical element? Fsc Physics Old Paper 23 Introduction

In todays digital age, the availability of Fsc Physics Old Paper 23 books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Fsc Physics Old Paper 23 books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Fsc Physics Old Paper 23 books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Fsc Physics Old Paper 23 versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Fsc Physics Old Paper 23 books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether youre a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Fsc Physics Old Paper 23 books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Fsc Physics Old Paper 23 books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit

organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Fsc Physics Old Paper 23 books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Fsc Physics Old Paper 23 books and manuals for download and embark on your journey of knowledge?

FAQs About Fsc Physics Old Paper 23 Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Fsc Physics Old Paper 23 is one of the best book in our library for free trial. We provide copy of Fsc Physics Old Paper 23 in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Fsc Physics Old Paper 23. Where to download Fsc Physics Old Paper 23 online for free? Are you looking for Fsc Physics Old Paper 23 PDF? This is definitely going to save you time and cash in something you should think about.
