

Geniventure Mission 3.2

Challenge III: Lower Costs

1. What is the goal of this challenge? Is achieving this different when you produce orange and grey shoes?
2. What are production methods in making products that achieve lower costs and reduce waste?
3. What costs are involved from the factory to the customer? How can the low cost be broken, if it can be and what does it mean to you?
4. How does the manufacturing process affect the production cost? How can you reduce the cost? The manufacturer produces the product at the same cost as it costs materials. It is the same as the manufacturer with a factory. Which affects the cost of the production of materials (plant and machinery) or the cost of materials.
5. What are your other challenges to help make the manufacturer? Reduced by changing the shoe design frequently, otherwise you can help the production of materials.
