

Dear Student.

At the beginning of the school year, I studied your photo eager to call you by name the first time we met. Now when I see a photo of you, I hear your laughter and remember fondly a conversation we have recently shared.

At the beginning of the year, you wore a name tag as I learned to match your face with your name. Now long before I see your face, I can sense you approach by the sound of your footsteps or the whisper of your voice.

At the beginning of the year, I was presented with your birth date. This told me nothing more than where you fell in the year. Now I know your birthday traditions, your favorite gift and who helped you celebrate your most recent milestone.

At the beginning of the year, I could see that behind your sparkling eyes, you were keen to learn, but I didn't know how to ignite that spark. Now I know what motivates you, your favorite way to learn, how to encourage you and what frustrates you most.

There is so much I know about you now. Who your best friend is, what you like to do on the weekend, your favorite book, color, sport and food. At the beginning of the year I couldn't possibly have known these things just by looking at your photo. Now it's hard to imagine a time I didn't know such important details about your life. This year, it has been my absolute pleasure having you as part of my everyday and my great privilege to have been part of yours!

At the end of our time together, after all we have shared and the memories we have made, I am reluctant for you to leave. But leave you must, for to ask you to stay would be to stifle the potential that bursts within you. So instead I ask a favor. Wherever you go and whatever you do, please remember that I will always be grateful for having taught you and you will always be important to me. Thank you for sharing your life and this year with me! You are special and you are special to me.

Teacher's Manual for Success Helen M. Shields, 2011-01-03 Although most medical school faculty members are required

to teach the standard medical school curriculum doesn't tell them how to do it well. This book does. An award-winning clinician teacher Helen M. Shields has spent her career training future doctors, researchers, and medical school instructors. Here she shares classroom-tested methods for developing, implementing, and evaluating effective curricula for medical students. Shields's five steps emphasize extensive behind-the-scenes preparation with a focus on visualizing both one's own performance and the desired student feedback: clear and logical presentations that match the material being taught; controlled exploration of topics through prepared questions and management of group dynamics; reinforcement of important concepts throughout the teaching session; a five-minute summary of take-home points. Shields's easy-to-follow guide discusses what teachers should do and what they should not do. She provides pertinent beginning-of-chapter questions, sample teaching materials, tips for last-minute assignments, and other pearls of wisdom. Shields also describes the methods of dynamic and effective instructors, offers a step-by-step approach to preparation and presentation, and relates proven ways to address a variety of expected and unexpected situations. Yeh,2016-12-21 This book examines the cause of the student achievement gap suggesting that the prevailing emphasis on socioeconomic factors sociocultural influences and teacher quality is misplaced The cause of the achievement gap is not differences in parenting styles or the economic advantages of middle class parents or differences in the quality of teachers Instead schools present learning tasks and award grades in ways that inadvertently undermine the self efficacy engagement and effort of low performing students causing demoralization and exacerbating differences in achievement that are seen to exist as early as kindergarten This process systematically maintains and widens initial gaps in achievement that might otherwise be expected to disappear over the K 12 years Misdiagnosis of the nature of the achievement gap has led to misguided solutions The author draws upon a range of research studies to support this view and to offer recommendations for improvement div div
