The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP and discusses university English language learners' learning needs and rights. The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility, moving from the oppression of language education to its liberation and the increasing critical consciousness among the present and future university youths in a time of great social changes.

The TOTIL method of education will help your child learn twice as much from kindergarten through high school. It's easy to understand and even easier to implement. TOT stands for time on task and IL stands for independent learning. By focusing on these two key areas, your child can be home schooled to become better at math, English, and advanced subjects. He or she will be able to write research and think better when it's time to enter college.

Dr. Doris Leclerc Ball, a retired teacher and psychologist, spent more than forty years perfecting the TOTIL method. In this guidebook, you'll discover the critical importance of learner-centered education, the obsolete nature of most teachers, and how to replace them; the simple curriculum and materials your child needs to succeed; many other insights on how to help your child learn. Your child can master the knowledge and skills necessary to compete at the highest levels for grades, jobs, and more. It begins with a roadmap for Revolutionizing Education in America.

Second Language Learning Before

Adulthood Vanessa De Wilde, Claire Goriot, 2022-10-24

Researchers have looked into the role of individual differences in second language learning and found that differences between learners in areas such as language aptitude, language learning motivation, and exposure to the language influence second language learning. Most of this research concerned adults. Far fewer studies have addressed the role of individual differences in second language learning of young learners. As second language learning programmes tend to start earlier than before and children are nowadays frequently exposed to a foreign language in social settings such as online games and social media, studying the role of individual differences in young learners can contribute both to SLA theories and to evidence-based L2 education. This book discusses recent findings concerning the role of individual differences in language learning in young learners. The chapters in the book concern different topics linked to internal individual differences such as language aptitude, motivation, attitude, and external individual differences such as exposure and type of instruction; the relative contribution of internal and external factors to language learning; and the interplay between the two types of individual differences.
