aktualisiert *Geography* John A. Matthews, David T. Herbert, 2008-05-22 Modern Geography has come a long way from its historical roots in exploring foreign lands and simply mapping and naming the regions of the world. Spanning both physical and human Geography, the discipline today is unique as a subject which can bridge the divide between the sciences and the humanities and between the environment and our society. Using wide ranging examples from global warming and oil to urbanization and ethnicity, this Very Short Introduction paints a broad picture of the current state of Geography, its subject matter, concepts and methods, and its strengths and controversies. The book's conclusion is no less than a manifesto for Geography's future. ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Adventure Tourism Management Ralf Buckley, 2011-01-03 The academic study of adventure tourism is rapidly increasing in popularity with research beginning to focus on it heavily. This book is a cohesive and comprehensive look at this multi million dollar industry sector from a variety of perspectives relevant to the teaching of tourism. Ideal for the undergraduate student taking adventure tourism as a single subject degree or as part of their tourism management studies, this book documents analyses and offers insight into the latest research in the area. Includes analysis of products, trends, climate change, risk management and environmental management and many others. The Subsectors section within the book offers an overview of the twenty or more definable sectors within the adventure tourism industry, considering their origins and history, latest trends and demographic groups. The author then goes on to look in more detail at Wildlife Tourism, Marine Tourism, Helitourism and Boardsports. Each chapter will include seven pedagogical elements: introduction, what the chapter does and doesn't cover, plain language review of the chapter topic with minimal referencing, essentially like lecture notes, concluding paragraph to the review section explaining how it leads to the next chapter's review of recent research, condensed into tables where possible, revision notes, a few pages of bullet points summarising the review and research, a sample set of assignment questions, three to six per chapter, in some cases readings on relevant topics condensed from previous publications.

Fintech, Pandemic, and the Financial System Suk-Joong Kim, 2023-01-17 Volume 22 *Fintech, Pandemic and the Financial System* examines systemic challenges faced by a wide range of financial market participants and the continued disruptions introduced by financial innovations. **Fintech**

Responsibilisation at the Margins of Welfare Services Kirsi Juhila, Suvi Raitakari, Christopher Hall, 2016-11-10 The impetus for this book is the shift in welfare policy in Western Europe from state responsibilities to individual and community responsibilities. The book examines the ways in which policies associated with advanced liberalism and New Public Management can be identified as influencing professional practices to promote personalisation, participation, empowerment, recovery and resilience. In examining the concept of responsibilisation from the point of view of both the responsibilised client and welfare worker, the book breaks from the

traditional literature to demonstrate how responsibilities are negotiated during multi professional care planning meetings home visits staff meetings focus groups and interviews with different stakeholders The settings examined in the book can be described as on the margins of welfare mental health substance abuse homelessness services and probation work where the rights and responsibilities of clients and workers are uncertain and constantly under review Each chapter approaches the management of responsibilities from a particular angle by combining responsabilisation theory and discourse analysis to examine everyday encounters Taken together the chapters paint a comprehensive picture of the responsabilisation practices at the margins of welfare services and provide an extensive discussion of the implications for policy and practice Drawing upon both the governmentality literature and everyday encounters the book provides a broad approach to a key topic It will therefore be a valuable resource for social policy public administration social work and human service researchers and students and social and health care professionals

Risk Governance Urbano Fra.Paleo,2014-10-19 This book explores the common language of politics ecology and risk and crosses their conceptual divides It seeks to shed light on the underlying structural factors processes players and interactions in the risk scenario all of which influence decision making that both increases and reduces disaster risk The first section explores risk governance under conditions of increasing complexity diversity and change The discussion includes chapters on The problem of governance in the risk society Making sense of decentralization Understanding and conceptualizing risk in large scale social ecological systems The disaster epidemic and Structure process and agency in the evaluation of risk governance Part II focused on governance in regions and domains of risk includes nine chapters with discussion of Climate governance and climate change and society Climate change and the politics of uncertainty Risk complexity and governance in mountain environments On the edge Coastal governance and risk and Governance of megacity disaster risks among other important topics Part III discusses directions for further advancement in risk governance with ten chapters on such topics as the transition From risk society to security society Governing risk tolerability Risk and adaptive planning for coastal cities Profiling risk governance in natural hazards contexts Confronting the risk of large disasters in nature and Transitions into and out of a crisis mode of socio ecological systems The book presents a comprehensive examination of the complexity of both risk and environmental policy making and of their multiple and not always visible interactions in the context of social ecological systems Just as important it also addresses unseen and neglected complementarities between regulatory policy making and ordinary individual decision making through the actions of nongovernmental actors A range of distinguished scholars from a diverse set of disciplines have contributed to the book with their expertise in many areas including disaster studies emergency planning and management ecology sustainability environmental planning and management climate change geography spatial planning development studies economy political sciences public administration communication as well as physics and geology

Public Religion and the Urban Environment Richard Bohannon,2012-04-26 Nature and the city have most often functioned as opposites within

Western culture a dichotomy that has been reinforced and sometimes challenged by religious images Bohannon argues here that cities and natural environments however are both connected and continually affected by one another He shows how such connections become overt during natural disasters which disrupt the narratives people use to make sense of the world including especially religious narratives and make them more visible This book offers both a theoretical exploration of the intersection of the city nature and religion as well as a sociological analysis of the 1997 flood in Grand Forks ND USA This case study shows how religious factors have influenced how the relationship between nature and the city is perceived and in particular have helped to justify the urban control of nature The narratives found in Grand Forks also reveal a broader understanding of the nature of Western cities highlighting the potent and ethically rich intersections between religion cities and nature

Flood Risk and Community Resilience Lindsey Jo McEwen, 2024-03-15 This book details the impact of flooding on our environment and the ways in which communities and those that work with them can act to manage the associated risks Flooding is an increasingly significant environmental hazard which inflicts major costs to the economies and livelihoods of developed countries This book explores how local communities can identify manage and adapt to the ever increasing damage flooding causes Focusing on the future role of local communities the benefits and challenges of their involvement and the potential areas of transformation this book provides insights into the efficacy of interdisciplinary and transdisciplinary working Alongside research into similar environmental hazards this book also draws upon the author's own knowledge of flood risk management in distinctive non contiguous interdisciplinary settings The chapters draw together a different and distinctive set of interdisciplinary themes in flood risk management and social resilience In doing so it strives to communicate the different ways of thinking that can usefully contribute to flood risk management This book would be ideal for those researching flood risk management alongside scholars and non scholars alike who are interested in finding ways of adapting to environmental hazards working with local communities

Africa-EU Relations and the African Continental Free Trade Area Samuel Ojo Oloruntoba, Christopher Changwe Nshimbi, Leon Mwamba Tshipaka, 2023-08-10 This book explores relations between states in the Africa European Union in view of the African Continental Free Trade Area both at a regional level and as a series of informal processes of socioeconomic and political interactions between state and non state actors The book reconsiders the ways in which actors in the Africa European Union relationship function and what that means for regionalism regionalisation and regional integration In addition to formalised state to state and inter regional interactions the book examines the impact of socio economic and political interactions with non state actors including those who engage with regional integration through formal and informal processes such as civil society activists African migration evangelists human smugglers and human traffickers The book thus demonstrates that regional and inter regional engagements include issues that extend beyond the usual discussions of trade The book is authored from an African perspective and will be of interest to academics who specialise in International Relations Political Economy Political

Sociology and African Studies Policy makers and various actors in civil society and think tanks who have an academic inclination and deal with trade migration and regionalism in Africa and Africa's relations with Europe will also find the book beneficial

Introducing Physical Geography Alan H. Strahler, 2013-03-27 The 6th edition of Introducing Physical Geography is known for its clear writing distinctive photos and illustrations and a strong supplements program The text continues its tradition as a great book to help non science readers visualize and understand earth processes and learn the basic language of physical geography The new edition features a strengthened Eye on Global Change coverage and coverage of the geographer's tool box

Thinking Geographically Alaric Maude, 2023-12-22 This book explains how the concepts of geography can teach young people to think geographically deeply and ethically Thinking Geographically demonstrates how the concepts of place space environment and interconnection teach students new ways of perceiving and understanding the world the concepts of scale and time teach them ways of analysing the world while the concepts of sustainability and wellbeing show them how to evaluate and reflect on what they observe and all eight concepts develop their higher order and critical thinking To further support teachers this book includes a chapter on how to teach for conceptual understanding as well as two chapters that illustrate the application of geographical thinking to an understanding of the effects of land cover change and the problem of regional inequality Rich with practical examples this book is an essential resource for geography teachers whether already teaching or studying to become one and for those who teach them

Developing the Rivers of East and West Africa Heather J. Hoag, 2013-09-12 How did rivers contribute to the economic and political development of modern Africa How did African and European notions of nature's value and meaning differ And how have these evaluations of Africa's rivers changed between 1850 and the present day Drawing upon examples from across the African continent Developing the Rivers of East and West Africa explores the role African waterways played in the continent's economic social and political development and provides the first historical study of the key themes in African river history Rivers acted as more than important transportation byways their waters were central to both colonial and postcolonial economic development efforts This book synthesizes the available research on African rivers with new evidence to offer students of African and environmental history a narrative of how people have used and engaged the continent's water resources It analyzes key themes in Africa's modern history European exploration establishment of colonial rule economic development green politics and each case study provides a lens through which to view social economic and ecological change in Africa
