

HOTEL MANAGEMENT SYSTEM PROJECT REPORT

Introduction

The hotel management system project is a software developed to maintain and manage the various hotel task and processes. Its main goals are to increase income, streamline operations, and eliminate human labor.

The primary goal of hotel management is to maintain a steady influx of visitors and guests, as well as to promote the hotel's extensive range of services and USPs and how they benefit visiting customers through marketing campaigns. This application allows the hotel management the ability to operate the entire system from a single online interface, giving them more power and flexibility.

Hotel Management System Project Abstract

The hotel management system aims to maintain and manage the various hotel tasks and processes. It is primarily responsible for hotel management in the database's core section. The system gives information on the various hotels that are available, as well as their current availability status. Guests can come to the website and register with the system by providing the required information. Each registered guest can request unit reservations. The guests are given information about the availability of the units because they have requested a specific time.

This application allows the hotel management the ability to operate the entire system from a single online interface, giving them more power and flexibility. Room booking, staff management, and other hotel management services are included in this project.

The manager can use the system to advertise available rooms. Customers may see and reserve rooms from the comfort of their own homes. Admin has the authority to approve or reject a customer's booking request. Other hotel services are also available for consumers to see and book. As a result, the system may be used by both consumers and management to control hotel activities on the go.

Hotel Management System Project Proposal

The Hotel Management System Project is proposed to give solutions to the major problems faced by various hotel management. This proposal for the hotel management system project has a collection of reasons why it should be developed and implemented. It includes a brief introduction of the project, problem statement, solution, and scope.

Problem Statement: Traditional hotel management does not include all functions, such as the location of the consumer, the amount of payment for the reservation, and what they are doing right now. The hotel is experiencing a number of issues that are affecting the hotel's reliability, performance, efficiency, and effectiveness in day-to-day operations.
