After the Earth Quakes Susan Elizabeth Hough, Roger G. Bilham, 2006 Earthquakes rank among the most terrifying natural disasters faced by mankind Out of a clear blue sky or worse a jet black one comes shaking strong enough to hurl furniture across the room human bodies out of bed and entire houses off of their foundations When the dust settles the immediate aftermath of an earthquake in an urbanized society can be profound Phone and water supplies can be disrupted for days fires erupt and even a small number of overpass collapses can snarl traffic for months However when one examines the collective responses of developed societies to major earthquake disasters in recent historic times a somewhat surprising theme emerges not only determination but resilience not only resilience but acceptance not only acceptance but astonishingly humor Elastic rebound is one of the most basic tenets of modern earthquake science the term that scientists use to describe the build up and release of energy along faults It is also the best metaphor for societal responses to major earthquakes in recent historic times After The Earth Quakes focuses on this theme using a number of pivotal and intriguing historic earthquakes as illustration The book concludes with a consideration of projected future losses on an increasingly urbanized planet including the near certainty that a future earthquake will someday claim over a million lives This grim prediction impels us to take steps to mitigate earthquake risk the innately human capacity for rebound notwithstanding

European Feminisms, 1700-1950 Karen M. Offen, 2000 This ambitious book explores challenges to male hegemony throughout continental Europe over the past 250 years For general readers and those interested primarily in the historical record it provides a comprehensive comparative account of feminist developments in European societies as well as a rereading of European history from a feminist perspective By placing gender or relations between women and men at the center of European politics it aims to reconfigure our understanding of the European past and to make visible a long but neglected tradition of feminist thought and politics On another level the book seeks to disentangle some misperceptions and to demystify some confusing contemporary debates about the Enlightenment reason nature and public vs private equality vs difference In the process the author aims to show that gender is not merely a useful category of analysis but that sexual difference lies at the heart of human thought and politics

Readers' Advisory Service in North American Public Libraries, 1870-2005 Juris Dilevko,Candice F.C.

Magowan,2007-02-13 Beginning in the early 1980s readers advisory services were a widely discussed topic in North American public libraries By 2005 almost every public library in the United States and Canada offered some form of readers advisory service The services offered have changed significantly in ways perhaps disadvantageous to adult North American library patrons This book provides a critical history of readers advisory philosophy and offers a new perspective on the evolution of the service The book analyzes the debate that shaped readers advisory and discusses how the service has assumed its present form The study follows readers advisory through its three prominent stages of development beginning with the period 1870 to 1916 when the service was still a subject of much crucial debate about its meaning and purpose During the second phase 1917 to 1962 readers advisory systematically committed itself to meaningful adult education through serious and purposeful reading The book argues however that during the most recent phase of readers advisory from 1963 until the present contemporary public libraries have turned their backs on the rich heritage of readers advisory services by valorizing the reading of entertainment oriented and commodified genre titles and bestsellers Historical analysis case studies and statistical charts augment the book s central argument
