House-Tree-Person: Projective Drawing Technique John N. Buck, 1992 **House-tree-person Projective Drawing Technique**, 1981 *The House-tree-person Technique* John N. Buck, 1966 *Handbook of Personality Assessment* Irving B. Weiner, Roger L. Greene, 2011-01-31

This comprehensive balanced guide to personality assessment written by two of the foremost experts in the field is sure to become the gold standard of texts on this topic. The Handbook of Personality Assessment covers everything from the basics including a historic overview and detailed discussion of the assessment process and its psychometric foundations to valuable sections on conducting the assessment interview and the nature interpretation and applications of the most popular self report objective and performance based projective measures. A concluding section of special topics such as computerized assessment ethical and legal issues and report writing are unique to this text.

House-Tree-Person John N. Buck, 1992 **House-Tree-Person** John N. Buck, 1992 **Exploring the Child's Personality** Coulacoglou Carina, 2008. The objective of this book is to provide readers with a comprehensive account of the child's personality. The book examines in detail significant personality dimensions from developmental clinical and cross cultural perspectives. The intricacies of personality are exposed by means of the Fairy Tale Test, an instrument that attempts to track the preconscious and unconscious processes that operate beneath the behavioral and overt manifestations of personality. Children's responses to the FTT questions are assessed both from a quantitative and a qualitative perspective. Twenty nine personality variables are used to rate the broad range of personality characteristics. No other personality test assesses such a large number of personality parameters. The qualitative evaluation of responses includes the analysis of 14 defense mechanisms, the study of the nature of anxiety, family dynamics and the examination of ego integration and ego strength. The unique quality of this book is the use of the FTT in the exploration of the child's personality using large samples of children derived from diverse cultures. Additional advantages of this book are the chapters which focus on the research into two significant personality traits, aggression and ambivalence, and the chapter on the analysis of idiosyncratic responses; the latter offers valuable information in the classification of original responses into levels of psychopathology. While the FTT has taken significant steps towards becoming a valid and reliable instrument, studies of its psychometric properties are an ongoing process. The book also includes examples, case studies and appendices for further study and review.
