Hunting Wildlife in the Tropics and Subtropics Julia E. Fa, Stephan M. Funk, Robert Nasi, 2022-09-01 The hunting of wild animals for their meat has been a crucial activity in the evolution of humans It continues to be an essential source of food and a generator of income for millions of Indigenous and rural communities worldwide Conservationists rightly fear that excessive hunting of many animal species will cause their demise as has already happened throughout the Anthropocene Many species of large mammals and birds have been decimated or annihilated due to overhunting by humans If such pressures continue many other species will meet the same fate Equally if the use of wildlife resources is to continue by those who depend on it sustainable practices must be implemented These communities need to remain or become custodians of the wildlife resources within their lands for their own well being as well as for biodiversity in general This title is also available via Open Access on Cambridge Core

States of Nature Tina Loo, 2011-11-01 Since the early days of the fur trade wildlife has been powerfully and inspiringly emblematic of Canada Yet the story of saving Canada's wildlife is largely unknown *States of Nature* is one of the first books to trace the development of Canadian wildlife conservation from its social political and historical roots While noting the influence of celebrity conservationists such as Jack Miner and Grey Owl Tina Loo emphasizes the impact of ordinary people on the evolution of wildlife management in Canada She also explores the elements leading up to the emergence of the modern environmental movement ranging from the reliance on and practical knowledge of wildlife demonstrated by rural people to the more aloof and scientific approach of state sponsored environmentalism Illustrated with evocative images of the Canadian wilderness of yesteryear and supported by historical case studies *States of Nature* will appeal to historians policy makers and wildlife managers as well as to general readers fascinated by the natural world and its champions
