Nigeria's Resource Wars Egodi Uchendu, 2021-03-02. Nigeria's Resource Wars reflects on the diversity of conflicts over access to and allocation of resources in Nigeria. From the devastating effects of crude oil exploration in the Niger Delta to desertification caused by climate change and illegal gold mining in Zamfara to mention a few, Nigeria faces new dimensions of resource-related struggles. The ravaging effects of these resource conflicts between crop farmers and Fulani herders in Nigeria's Middlebelt and states across Southern Nigeria call for urgent scholarly interventions with the Fulani cattle breeders' onslaught altering

the histories of many Nigerian families through deaths loss of homes and investments and permanent physical incapacity Currently there is an almost total breakdown of interethnic relations with political commentators acknowledging that Nigeria has never been so divided as it presently is in its history The struggles have now degenerated into kidnaps armed robbery and incessant targeted and random killings across the country compounding the already complex problem of insecurity in Nigeria The chapters in this volume engage with these issues presenting the different arguments on resource conflicts in Nigeria They draw insights from similar conflicts in Nigeria s colonial post independence past and events from around the world to proffer possible solutions to resource related confrontations in Africa By offering a collection of different intellectual perspectives on resource conflicts in Nigeria this volume will be an important reference material for understanding the diversity of thought patterns that underpin the struggle and policy approaches towards resolving conflict situations in Africa This volume will be of considerable interest to scholars of Africa researchers in the humanities social sciences and conflict studies and policymakers interested in understanding the resource crisis in Africa

Environmental Water Markets and Regulation Katherine Owens, 2016-11-18 River systems around the world are degraded and are being used unsustainably Meeting this challenge requires the development of flexible regimes that have the potential to meet essential consumptive needs while restoring environmental flows This book focuses on how water trading frameworks can be repurposed for environmental water recovery and aims to conceptualise the most appropriate role for law in supporting recovery through these frameworks The author presents a comprehensive study of the legal frameworks in four jurisdictions the States of Oregon and Colorado in the western United States the province of Alberta in Canada and the Murray Darling Basin in Australia Basin State of New South Wales A close comparative analysis of these four jurisdictions reveals a variety of distinctive regulatory arrangements and collaborations between public and private actors In all cases the law has been deployed to steer and coordinate these water governance activities The book argues that each regime is based on a particular regulatory strategy with different conceptions of the appropriate roles for and relationships between various actors and institutions Legal frameworks do not have the capacity to rationalise and provide an overarching and absolute solution to the complex environmental and governance issues that arise in the context of environmental water transactions Rather the role of law in this context needs to be reconceptualised within the paradigm of regulatory capitalism as establishing and maintaining the limits within which regulatory participants can operate innovate and collaborate

Progress Toward Restoring the Everglades National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Water Science and Technology Board, Committee on Independent Scientific Review of Everglades Restoration Progress, 2019-03-27 During the past century the Everglades one of the world's treasured ecosystems has been dramatically altered by drainage and water management infrastructure that was intended to improve flood management urban water supply and agricultural production The remnants of the original Everglades now compete for water with urban and agricultural interests and are impaired by contaminated runoff from these two sectors The Comprehensive Everglades Restoration Plan CERP a joint effort launched by the state and the federal government in 2000 seeks to reverse the decline of the ecosystem The multibillion dollar project was originally envisioned as a 30 to 40 year effort to achieve ecological restoration by reestablishing the natural hydrologic characteristics of the Everglades where feasible and to create a water system that serves the needs of both the natural and the human systems of South Florida Over the past two years impressive progress has been made in planning new CERP projects and the vision for CERP water storage is now becoming clear Construction and completion of authorized CERP projects will likely take several decades and at this pace of restoration it is even more imperative that agencies anticipate and design for the Everglades of the future This seventh biennial review assesses the progress made in meeting the goals of the CERP and provides an in depth review of CERP monitoring with particular emphasis on project level monitoring and assessment It reviews developments in research and assessment that inform restoration decision making and identifies issues for in depth

evaluation considering new CERP program developments policy initiatives or improvements in scientific knowledge that have implications for restoration progress
