

## Air Conditioning

### AIR CONDITIONING CONTROLS

The air conditioning system features automatic temperature and air distribution control, which is programmed to maintain optimum levels of comfort within the vehicle in all but the most severe climatic conditions.

Where the controls can be adjusted manually to satisfy individual requirements, allowing the system to function automatically (in Auto mode) is by far the simplest method of operation for the driver and is preferable in most operating conditions.

#### 1. Auto mode

- Press **AUTO** (7) for fully automatic operation.
- Press the temperature control switches (2) on either side of the display to select the required temperature.
- Let the automatic temperature control system do the rest.

In Auto mode, air distribution and blower speeds are adjusted automatically to ensure and then maintain the desired temperature (An enclosed area in the centre of the three-leaf symbol together with the air distribution and blower speed settings).

Even the air distribution and blower controls can be operated independently to override automatic setting. In this case, the three-leaf symbols will move outside the enclosure in the centre of the display to indicate that they are no longer being controlled automatically.

**NOTE:** If the air distribution and blower controls are operated independently, the system will not be able to achieve or maintain target temperature settings.

## Air Conditioning

**Temperature control:** Press the temperature control switches on either side of the display to select the required temperature for the vehicle. The system will adjust the blower speed and air distribution to maintain the set temperature. The system will also adjust the fan speed and air distribution to maintain the set temperature.

Temperature above 20°C (68°F) and below 10°C (50°F) cannot be set. Above or below these maximum and minimum settings, the system will adjust to the nearest setting.

The temperature shown on the display is the actual temperature, only and not the set temperature. The system will adjust the fan speed and air distribution to maintain the set temperature.

**NOTE:** The system will not operate if the temperature on the passenger side of the vehicle is more than 3°C (5°F) greater or less than the temperature set for the driver's side.

#### 2. Manual mode

If the indicator is missing or correct in set, press the **TEMP** button. The system will manually adjust its output to achieve maximum power (blowing).

- Setting the blower speed to maximum.
- Setting the air flow to the screen only.
- Setting the fan speed to maximum.
- Setting the fan speed to maximum.

When the fan speed is set to maximum, the fan speed will be set to maximum.

**NOTE:** Temperature and blower speed control can be adjusted and air recirculation used manually if required.

Press the **SCREEN** button a second time per set **AUTO** to leave the **Display** mode - the system will adjust automatically to Auto mode.

#### 3. Economy mode

Press the **ECON** button to operate (the display shows **ECON**).

In economy mode the air conditioning compressor is switched off and the system functions as a conventional heating and ventilation system. This reduces the load on the engine, thereby reducing fuel consumption.

When the exterior temperature is lower than the temperature required for the passenger compartment.

The air distribution, blower and recirculation controls can be operated independently.

Pressing the **TEMP** button a second time will switch the air conditioning compressor on and return the system to Auto mode.

**NOTE:** In Economy mode, it is possible to switch the blower off (no segments showing in the display).

#### 4. On/Off button

Press to switch on or off. When switching on, note that the system automatically resets the mode and control settings that were last used.

#### 5. Blower button

Press the button to adjust the blower speed. The blower speed increases incrementally with each press of the button, until maximum fan speed is reached (the display shows five segments and the word **MAX**).

Once the maximum fan speed has been reached, another press of the button returns the blower to its slowest speed (one segment shows in the display).
