Although the Forward Control Land-Rover is completely unlike any other Land-Rover in appearance it retains 75% of the standard Land-Rover parts. This is of particular significance to fleet users as those parts which are most often serviced are identical with those fitted to other Land-Rovers. A wide range of optional equipment is available for the Forward Control Land-Rover. For instance, provision has been made for mounting the Land-Rover hydraulic winch between the chassis members under the centre of the body. Because the vehicle has been designed specifically to fill the requirement for a vehicle able to carry heavy loads across the most rugged country there are no rear power take-off facilities. It will, however, be possible to drive body-mounted equipment from a centre power take-off.
