mental health disciplines such as child psychiatrists or psychiatric social workers sometimes are overwhelmed The purpose of this book therefore is to provide the clinician with practical information regarding developmental and psychological testing thereby making the health care professional an educated consumer This text does not simply describe how psychologists perform testing rather it provides information to help clinicians understand what the tests con tain what their strengths and limitations are and how they can be incorporated into practice **Case Studies in Communication Disorders** Louise Cummings,2016-10-06 This is a collection of 48 highly useful case studies of children and adults with communication disorders *New Directions In Language Development And Disorders* Michael Perkins,Sara Howard,2012-12-06 Research into child language development is being conducted more extensively by more people and in more countries throughout the world than at any point in the past We now know more than we ever did before about the linguistic cognitive neurobio logical and social capacities that children bring to their language learning task as well as the ways in which these capacities interact with a whole range of factors present in the child s environment throughout the learning process not least the particular character istics of the language or languages to which the child is exposed Far from inducing a sense of complacency this new knowledge seems instead to create an even stronger impetus to know more This is partly because of the new and unforeseen questions it raises and partly because of competition between different theories to provide the best explanation of the phenomenon and which in turn engender different methods of enquiry This volume addresses many of the key issues which are currently exercising the minds of child language researchers and which are likely to motivate research for some years to come The chapters included here all previously unpublished present a great deal of new data and address a range of theoretical issues from a variety of perspectives
