Language Education And Discourse Functional Approaches:

Language, Education and Discourse Joseph Foley, 2005-12-05 This collection of essays by leading functional linguists presents the latest perspectives on language and discourse in educational settings The book questions the idea of discourse to reveal that the social processes of learning are imbued with the ideologies of the society and education system within which learning takes place The contributors take into account the historical and cross cultural perspectives of both classroom practices and the student's own awareness of the ideological meanings of language activities Language Education and Discourse is divided into two sections Part one covers early childhood and the growing development of a language system from the basic semiotic system of the infant This is followed by an analysis of the beginnings of literacy in kindergarten the introduction to writing in primary school and the ideological content of reading material Part two furthers this analysis by looking at discourse in secondary and tertiary education The contributors pose questions about the role and importance of teaching grammar in the school system and finally examine how to refine the discourse of education This book will be useful to academics interested in the latest functional perspectives on language as it is used in education *Testing the Untestable in Language Education* Amos Paran, Lies Sercu, 2010 The testing and assessment of language competence continues to be a much debated issue in foreign language teaching and research This book is the first one to address the testing of four important dimensions of foreign language education which have been left largely unconsidered learner autonomy intercultural competence literature and literary competence and the integration of content and language learning Each area is considered through a theoretical framework followed by two empirical studies raising questions of importance to all language teachers How can one test literary competence Can intercultural competence be measured What about the integrated assessment of content and language in CLIL and teaching Is progress in autonomous learning skill gaugeable The book constitutes essential reading for anyone interested in the testing and assessment of seemingly largely untestable aspects of foreign language competence The title of this book is well chosen Despite the apparent oxymoron this collection of papers succeeds in addressing important issues of educational policy and theory with the precision born of empirical work combined with discussion of principles This book will open new options for testers for teachers and for those who make policy decisions Michael Byram School of Education University of Durham UK [Handbook of Research in Second Language Teaching and Learning](#) Eli Hinkel, 2011-01-25 This landmark volume provides a broad based comprehensive state of the art overview of current knowledge and research into second language teaching and learning All authors are leading authorities in their areas of expertise The chapters all completely new for Volume 2 are organized in eight thematic sections Social Contexts in Research on Second Language Teaching and Learning Second Language Research Methods Second Language Research and Applied Linguistics Research in Second Language Processes and Development Methods and Instruction in Second Language Teaching Second Language Assessment Ideology Identity Culture and Critical Pedagogy in

Designing Learning with Embodied Teaching Fei Victor Lim, 2020-08-27 Teaching and learning involve more than just language The teachers use of gestures the classroom spaces they occupy and the movements they make as well as the tools they use work together with language as a multimodal ensemble of meanings Embodied teaching is about applying the understandings from multimodal communication to the classroom It is about helping teachers recognise that the moves they make and the tools they use in the classroom are part of their pedagogy and contribute to the design of the students learning experience In response to the changing profile and needs of learners in this digital age pedagogic shifts are required A shift is the evolving role of teachers from authority of knowledge to designers of learning This book discusses how using examples drawn from case studies teachers can use corporeal resources and digital tools to design learning experiences for their students It advances the argument that the study of the teachers use of language gestures positioning and movement in the classroom from a multimodal perspective can be productive This book is intended for educational researchers and teacher practitioners as well as curriculum specialists and policy makers The central proposition is that as teachers develop a semiotic awareness of how their use of various meaning making resources express their unique pedagogy they can use these multimodal resources aptly and fluently to design meaningful learning experiences This book also presents a case for further research in educational semiotics to understand the embodied ways of meaning making in the pedagogic context

research to guide and support classroom practitioners the two concerns suggesting a central and reciprocal relationship between research and pedagogy However this relationship has at times been unbalanced and its centrality has sometimes gone by default problems which this volume aims to address The introduction proposes criteria to improve the congruence between the research base of TBLT and the concerns and terms of reference of classroom practitioners Using a range of methodologies the individual chapters illustrate and explore different aspects of this theme The book will be of interest to all those wishing to further their understanding of and or investigate the use of TBLT in educational contexts
