Language of Science M.A.K. Halliday, 2006-06-19 Halliday's investigations into grammatical metaphor take us deeply into the way we construct and expand meanings starting with representations of concrete experienced events and ending with theoretical worlds populated by abstract entities linked through generalized relations and causalities. He finds these processes most strikingly in the development of the modern sciences that have historically created robust virtual worlds of theory from observable material events. He sees the same processes of grammatical metaphor as children learn to participate in our built symbolic environment particularly as they are introduced to these meaning systems in schools, an institution designed expressly for that purpose. Professor Charles Bazerman, University of California Santa Barbara. *NARRATIVE VOICE IN POPULAR SCIENCE IN THE BRITISH PRESS: A CORPUS ANALYSIS ON THE CONSTRUCTION OF ATTRIBUTED MEANINGS* Miriam PÉREZ VENEROS, 2017-12-01 Esta tesis doctoral versa sobre el estudio de la construcción de la atribución del significado en la diseminación de la ciencia en la prensa británica a través del análisis de los recursos utilizados por el periodista para integrar en su narración de los hechos científicos lo que otras fuentes externas han dicho. El fenómeno de la atribución en el discurso académico científico y de los medios de comunicación se ha descrito previamente desde una perspectiva interpersonal mediante el análisis de la evaluación y de la teoría de la valoración appraisal. Además, otras investigaciones previas se han centrado también en el estudio de cómo los elementos experienciales de la atribución. Sin embargo, el estudio llevado a cabo en esta tesis doctoral trata de proporcionar una descripción más exhaustiva y una visión global de cómo se construye la atribución desde una perspectiva experiencial. El objetivo de esta tesis es explorar cómo los elementos experienciales que construyen la atribución coocurren en cada una de las unidades de voz identificadas y contribuyen tanto a la interacción del periodista con sus lectores como al posicionamiento epistemológico de dicho periodista con respecto de la información narrada. **War and Its Ideologies** Annabelle Lukin, 2018-10-09 Ideology is so powerful it makes us believe that war is rational despite both its brutal means and its devastating ends. The power of ideology comes from its intimate relation to language: ideology recruits all semiotic modalities but language is its engine room. Drawing on Halliday's linguistic theory, in particular his account of the semiotic big bang, this book explains the latent semiotic machinery of language on which ideology depends. The book illustrates the ideological power of language through a study of perhaps the most significant and consequential of our ideologies: those that enable us to legitimate, celebrate, even venerate war at the same time that we abhor, denounce, and proscribe violence. To do so, it makes use of large multi-register corpora including the British National Corpus and the reporting of the 2003 invasion of Iraq by Australian, US, European, and Asian news sources. Combining detailed text analysis with corpus linguistic methods, it provides an empirical analysis showing the astonishing reach of our ideologies of war and their profoundly covert and coercive power. Handbook of Research on Writing Charles Bazerman, 2009-03-04 The Handbook of Research on Writing ventures to sum up inquiry over the last few decades on what

we know about writing and the many ways we know it How do people write How do they learn to write and develop as writers Under what conditions and for what purposes do people write What resources and technologies do we use to write How did our current forms and practices of writing emerge within social history What impacts has writing had on society and the individual What does it mean to be and to learn to be an active participant in contemporary systems of meaning This cornerstone volume advances the field by aggregating the broad ranging interdisciplinary multidimensional strands of writing research and bringing them together into a common intellectual space Endeavoring to synthesize what has been learned about writing in all nations in recent decades it reflects a wide scope of international research activity with attention to writing at all levels of schooling and in all life situations Chapter authors all eminent researchers come from disciplines as diverse as anthropology archeology typography communication studies linguistics journalism sociology rhetoric composition law medicine education history and literacy studies The Handbook s 37 chapters are organized in five sections The History of Writing Writing in Society Writing in Schooling Writing and the Individual Writing as Text This volume in summing up what is known about writing deepens our experience and appreciation of writing in ways that will make teachers better at teaching writing and all of its readers better as individual writers It will be interesting and useful to scholars and researchers of writing to anyone who teaches writing in any context at any level and to all those who are just curious about writing
