Software Pioneers Manfred Broy,Ernst Denert,2012-12-06 A lucid statement of the philosophy of modular programming can be found in a 1970 textbook on the design of system programs by Gouthier and Pont 1 l Cfl0 23 which we quote below A well defined segmentation of the project effort ensures system modularity Each task fonos a separate distinct program module At implementation time each module and its inputs and outputs are well defined there is no confusion in the intended interface with other system modules At checkout time the in tegrity of the module is tested independently there are few sche duling problems in synchronizing the completion of several tasks before checkout can begin Finally the system is maintained in modular fashion system errors and deficiencies can be traced to specific system modules thus limiting the scope of detailed error searching Usually nothing is said about the criteria to be used in dividing the system into modules This paper will discuss that issue and by means of examples suggest some criteria which can be used in decomposing a system into modules A Brief Status Report The major advancement in the area of modular programming has been the development of coding techniques and assemblers which 1 allow one modu1e to be written with little knowledge of the code in another module and 2 alJow modules to be reas sembled and replaced without reassembly of the whole system **The Ecclesiastical gazette, or, Monthly register of the affairs of the Church of England** ,1861 **The Cambridge Review** ,1881 **Congressional Record** United States. instantly thanks to the Internet but to find out what is happening in contiguous fields what problems and results are of great interest here is not at all easy Returning to my own book I note with a certain pride that at least I seem to have evaluated accurately the trends in the development of theoretical physics It is the combination of physics with topology and algebraic geometry that has led to the brightest achievements of mathematical physics in the last decade It suffices to note the remarkable results of S *Délibérations Et Mémoires de la Société Royale Du Canada* Royal Society of Canada,1921
