Measuring Up Staar Biology Teacher:

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Differentiated Teacher Evaluation and Professional Learning Mary Lynne Derrington, Jim Brandon, 2019-05-15 This book discusses teacher evaluation and how it can provide the foundations for professional development The editors and contributors illustrate how teachers with varying levels of expertise experience and learning needs can benefit from differentiated evaluation and professional development designed to help them reach their full potential The book examines various aspects of differentiation including levels of experience from pre service to veteran practices of school principals as they supervise and evaluate staff and wider education policies that can support or hinder differentiation Providing fascinating insights into how teacher evaluation policies can support practice in a variety of contexts this timely collection will be of interest and value to students and scholars of teacher evaluation and professional development
