Modernity Britain 1957 1962:

Modernity Britain David Kynaston, 2014-12-02 This edition collects both volumes of Modernity Britain for the first time Following Austerity Britain and Family Britain the third volume in David Kynaston's landmark social history of post war Britain Triumphant A historian of peerless sensitivity and curiosity about the lives of individuals Financial Times This superb history captures the birth pangs of modern Britain It is a part of Kynaston's huge achievement that such moments of insight and pleasure should accompany what has become a monumental history of our recent past The Times _____ David Kynaston's history of post war Britain has so far taken us from the radically reforming Labour governments of the late 1940s in Austerity Britain and through the growing prosperity of Family Britain's more placid 1950s Now Modernity Britain 1957-62 sees the coming of a new Zeitgeist as Kynaston gets up close to a turbulent era in which the speed of social change accelerated The late 1950s to early 1960s was an action packed often dramatic time in which the contours of modern Britain began to take shape These were the never had it so good years when the Carry On film series got going and films like Room at the Top and the first soaps like Coronation Street and Z Cars brought the working class to the centre of the national frame when CND galvanised the progressive middle class when youth emerged as a cultural force when the Notting Hill riots made race and immigration an inescapable reality and when meritocracy became the buzz word of the day In this period the traditional norms of morality were perceived as under serious threat Lady Chatterley's Lover freely on sale after the famous case and traditional working class culture was changing wakes weeks in decline the end of the maximum wage for footballers The greatest change though concerned urban redevelopment city centres were being yanked into the age of the motor car slum clearance was intensified and the skyline became studded with brutalist high rise blocks Some of this transformation was necessary but too much would destroy communities and leave a harsh fateful legacy This profoundly important story of the transformation of Britain as it arrived at the brink of a new world is brilliantly told through diaries letters newspapers and a rich haul of other sources and published in one magnificent paperback volume for the first time **1938: Modern Britain** Michael John Law, 2017-12-14 In 1938 Modern Britain Michael John Law demonstrates that our understanding of life in Britain just before the Second World War has been overshadowed by its dramatic political events 1938 was the last year of normality and Law shows through a series of case studies that in many ways life in that year was far more modern than might have been thought By considering topics as diverse as the opening of a new type of pub the launch of several new magazines the emergence of push button radios and large screen televisions sets and the building of a huge office block he reveals a Britain both modern and intrigued by its own modernity that was stopped in its tracks by war and the austerity that followed For some life in Britain was as consumerist secular Americanized and modern as it would become for many in the late 1950s and early 1960s Presenting a fresh perspective on an important year in British social history illuminated by six engaging case studies this is a key study for students and scholars of 20th century Britain *Inventing the Built Environment* Juliana Yat

Shun Kei, 2024-06-28 Why and how was the term built environment first introduced Inventing the Built Environment retrieves the origin of this ubiquitous term The articulation of the built environment Kei demonstrates coincided with the redefinition of education research and professional practices in architecture and town planning in 1960s Britain Concentrating on the half decade during which the term permeated the architectural and planning professions this book recalls a time when the built environment was conceived as a part of the British government's effort in national economic planning Inventing the Built Environment unpacks the proposal for a Research Council for the Built Environment to mobilise architecture and town planning for political economy How a relatively small group of architects planners politicians and researchers transposed scientific thoughts from biology economics and computation into the built environment will be considered too Kei highlights the assumptions about and classification of the population that were made when inventing the built environment The architectural and biosocial implications of the making and remaking of this architectural environmental notion in Britain and beyond will be revealed through the works of pre eminent architect planners including Richard Llewelyn Davies and William Holford At a time when environmental concerns again take the front seat of architectural and planning debates this book offers for scholars and students an alternative lens to reflect on the assumptions and bias that can be embedded in our architectural lexicons

Modernity Britain David Kynaston, 2013-07-09 Following Austerity Britain and Family Britain the third and fulcrum volume in David Kynaston's landmark social history of post war Britain Adult Responses to Popular Music and Intergenerational Relations in Britain, c. 1955-1975 Gillian A. M. Mitchell, 2019-02-28 Adult Reactions to Popular Music and Intergenerational Relations in Britain 1955-1975 challenges stereotypes concerning a post war generation gap exacerbated by rebellion inducing popular music styles by demonstrating the considerable variety which frequently characterized adult responses to the music whilst also highlighting that the impact of the music on inter generational relations was more complex than is often assumed NP Utilizing extensive primary evidence from first person accounts to newspapers television programmes surveys and archive collections the book adopts a thematic approach identifying three key arenas of British society in which adult responses to popular music and the impact of such reactions upon relations between generations seem particularly revealing and significant The book examines in detail the place of popular music within family life and Christian churches and their engagement with popular music particularly within youth clubs It also explores encounters between the worlds of traditional Variety entertainment and popular music while providing broader perspectives on this most dynamic and turbulent of periods

Working-Class Community in the Age of Affluence Stefan Ramsden, 2017-02-24 It has appeared to many commentators that the most fundamental change in what it is meant to be working class in twentieth century Britain came not as a result of war or of want but of prosperity Social investigators documented how the relative affluence of the 1950s and 1960s improved the material conditions of life for working class Britons whilst eroding their commitment to the shared life of traditional communities Utilising an oral history case study of

sociability and identity in the Yorkshire town of Beverley between the end of the Second World War and the election of Margaret Thatcher's government Working Class Community in the Age of Affluence challenges this influential narrative An introductory essay outlines how sociologists and historians understood the complex social cultural and economic changes of the post war decades through the prism of affluence and traces how these changes came to be seen as deleterious to the traditional working class community The book then proceeds thematically exploring change across areas of social life including family neighbourhood workplace and associational life This book represents the first sustained historical analysis of change and continuity in working class community living during the age of affluence It suggests not only that older social practices persisted but also that new patterns of sociability could strengthen as much as undermine community Ultimately Working Class Community in the Age of Affluence asks us to rethink assumptions about the decline of local solidarities in this pivotal period and to recognise community as a key feature of working class life across the twentieth century **The**

World Away Michael John Law, 2022-01-15 The 1950s and 1960s were a transformative period in Britain and an important part of this was how Britons' lives were changed when they began flying abroad for their holidays In A World Away Michael John Law investigates how something that previously only the rich could afford became available to working class holidaymakers A World Away moves beyond the big players in the tourist industry and technical accounts of the airplanes used by tour operators to tell the histories of the people who were there both tourists and tour guides using their personal testimonies Until now there has been uncertainty about the identity of these new tourists some feared they were working class intruders who might invade the pristine destinations favoured by the elite others claimed that most were from the middle class Using new data derived from flight accident investigations Law explains the complex origins of these new flyers In British society this unprecedented mobility could not go unpunished and the new tourists were lampooned in books and newspapers aimed at the middle classes Law shows how popular culture movies and music influenced the decision to travel and what actually happened when these new holidaymakers went abroad Law investigates the package tour industry from its

mid century origins through its inherent weaknesses governmental interference and unforeseen world events that contributed to its partial failure in the early 1970s A World Away provides the definitive account of this important change in postwar British society

Law, Insecurity and Risk Control John Pratt, 2020-08-05 This book examines our contemporary preoccupation with risk and how criminal law and punishment have been transformed as a result of these anxieties It adopts an historical approach to examine the development of risk control measures used across the US UK New Zealand Australia and Canada particularly since the 1980 s with the rise of the security sanction It also takes a criminological and sociological approach to analysing shifts in criminal law and punishment and its implications for contemporary society and criminal justice systems Law Insecurity and Risk Control analyses the range and scope of the security sanction and its immobilizing measures ranging from control over minor incivilities to the most serious crimes Despite these innovations though it argues that our anxieties about risk have become so extensive that the security sanction is no longer sufficient to provide social stability and cohesion As a consequence people have been attracted to the magic of populism in a revolt against mainstream politics and organisations of government as with the EU referendum in the UK and the US presidential election of Donald Trump in 2016 While there have been political manoeuvrings to rein back risk and place new controls on it these have only brought further disillusionment insecurity and anxiety This book argues that the security sanction is likely to become more deeply embedded in the criminal justice systems of these societies as new risks to both the well being of individuals and the nation state are identified

House of Nutter Lance Richardson, 2018-05-01 The strange illuminative true story of Tommy Nutter the Savile Row tailor who changed the silhouette of men s fashion and his rock photographer brother David who captured it all on film From an early age there was something different about Tommy and David Nutter Growing up in an austere apartment above a caf catering to truck drivers both boys seemed destined to lead rather humble lives in post war London Tommy as a civil servant David as a darkroom

technician Yet the strength of their imagination plus a little help from their friends transformed them instead into unlikely protagonists of a swinging cultural revolution In 1969 at the age of twenty six Tommy opened an unusual new boutique on the golden mile of bespoke tailoring Savile Row While shocking a haughty establishment resistant to change Nutters of Savile Row became an immediate sensation among the young rich and beautiful beguiling everyone from Bianca Jagger to the Beatles who immortalized Tommy s designs on the album cover of Abbey Road Meanwhile David s innate talent with a camera vaulted him across the Atlantic to New York City where he found himself in a parallel constellation of stars Yoko Ono Elton John who enjoyed his dry wit almost as much as his photography House of Nutter tells the stunning true story of two gay men who influenced some of the most iconic styles and pop images of the twentieth century Drawing on interviews with more than seventy people and taking advantage of unparalleled access to never before seen pictures letters sketches and diaries journalist Lance Richardson presents a dual portrait of brothers improvising their way through five decades of extraordinary events their personal struggles playing out against vivid backdrops of the Blitz an obscenity trial the birth of disco and the devastation of the AIDS crisis A propulsive deftly plotted narrative filled with surprising details and near operatic twists House of Nutter takes readers on a wild ride into the minds and times of two brilliant dreamers **Born to**

Boom Cities Otto Saumarez Smith, 2019-03-21 Boom Cities is the first published history of the profound transformations of British city centres in the 1960s It has often been said that urban planners did more damage to Britain's cities than even the Luftwaffe had managed and this study details the rise and fall of modernist urban planning revealing its origins and the dissolution of the cross party consensus before the ideological smearing that has ever since characterized the high rise towers dizzying ring roads and concrete precincts that were left behind The rebuilding of British city centres during the 1960s drastically affected the built form of urban Britain including places ranging from traditional cathedral cities through to the decaying towns of the industrial revolution Boom Cities uncovers both the planning philosophy and the political cultural and legislative background that created the conditions for these processes to occur across the country Boom Cities reveals the role of architect planners in these transformations The volume also provides an unconventional account of the end of modernist approaches to the built environment showing it from the perspective of planning and policy elites rather than through the emergence of public opposition to planning
