Modigliani 90 Paintings Paintings Drawings 4:

Modigliani: 90 Paintings (Paintings) Jessica Findley, 2014-11-28 Amedeo Clemente Modigliani was an Italian painter and sculptor who worked mainly in France. Primarily a figurative artist, he became known for paintings and sculptures in a modern style characterized by mask-like faces and elongation of form. Amedeo Modigliani was born July 12, 1884, in Livorno, Italy. After studying in Italy, Modigliani settled in Paris and exhibited at the Salon des Indépendants. Following the advice of Brancusi, he studied and was influenced by African sculpture. In 1917, he began painting a series of female nudes that are among his best works. Modigliani died in 1920 in Paris of tubercular meningitis, exacerbated by poverty, overwork, and addiction to alcohol and narcotics.

Art in Chemistry Barbara R. Greenberg, Dianne Patterson, 2007-12-30 Integrate chemistry and art with hands-on activities and fascinating demonstrations that enable students to see and understand how the science of chemistry is involved in the creation of art. Investigate such topics as color integrated with electromagnetic radiation, atoms and ions, paints integrated with classes of matter, specifically solutions, three-dimensional works of art integrated with organic chemistry, photography integrated with chemical equilibrium, art forgeries integrated with qualitative analysis, and more. This is a complete and sequential introduction to General Chemistry and Introductory Art topics. In this newly revised edition, the author, a retired Chemistry teacher, gives extensive and in-depth new explanations for the experiments and demonstrations, as well as expanded safety instructions to insure student safety. Grades 7-12. *Entitled* Jennifer C. Lena, 2021-12-07 Two centuries ago, wealthy entrepreneurs founded the American cathedrals of culture: museums, theater companies, and symphony orchestras to mirror European art. But today's American arts scene has widened to embrace multitudes: photography, design, comics, graffiti, jazz, and other forms of folk, vernacular, and popular culture. What led to this dramatic expansion? *Entitled* shows how organizational transformations in the American art world, amid a shifting political, economic, technological, and social landscape, made such change possible. The 1964 editioned replicas of the readymades sent shock waves through the art world. Even though the replicas undermined ideas of authorship and problematized the notion of identity and the artist, they paradoxically shared in the aura of the originals, becoming stand-ins for the readymades. Scholar, poet, dealer, Arturo Schwarz played a crucial role opening the door to joint or alternate authorship, an outstanding relationship between artist and dealer.

By unearthing previously unpublished correspondence and documentary materials and combining this material with newly conducted exclusive interviews with key participants *Remaking the Readymade* details heretofore unrevealed aspects of the technical processes involved in the re creation of iconic long lost Dada objects Launched on the heels of the centenary of Duchamp's *Fountain* this new analysis intensifies and complicates our understanding of Duchamp and Man Ray initial conceptions and raises questions about replication and authorship that will stimulate significant debate about the legacy of the artists the continuing significance of their works and the meaning of terms such as creativity originality and value in the formation of art

Neuroscience and Art Amy Ione, 2024-08-27 This book is focused on how understanding ourselves as humans is incomplete without considering both biological and cultural aspects Using the neurocultural perspective the book explores how everything in the world is filtered back and forth through the brain and culture The thrust of the book therefore is to explore the power of art in creating a bridge between cultural and neuroscientific lines of inquiry Looking at both clinical and non clinical populations the text examines historical foundations distinguishes congenital developmental conditions from those that are acquired and emphasizes how the brain constructs our sensory experiences Several distinctive features separate this research from other publications First the book opens with a review of how the historical literature is still etched into the ideas we employ to explain elements across the interdisciplinary fields of art aesthetics our sensory experience psychology cognition and well being Second the research adopts a humanistic rather than a philosophical or social science perspective in demonstrating the value of coupling anatomy and physiology with

the natural and social environment In this artists from all genres are incorporated Among them are Iris Murdoch Ludwig van Beethoven Leonardo da Vinci Cristoforo de Predis Rembrandt Federico Fellini Chuck Close and David Hockney Case studies demonstrate how neuroscientific research meshes with art individual and cultural variables in ways that range from health and well being to physiological decline and biological traumas These include a case study that examines how Oliver Sacks combined biology and biography in his writings It also explores art projects in several genres inspired by his studies Another case study is on the role of film as a useful clinical tool Here the book also demonstrates that cinematic devices used by filmmakers intersect with perceptual and cognitive neuroscience A defining feature of the analysis is the integration of research on brain injuries with humanistic responses in film literature and the visual arts This section outlines the lack of consensus regarding the causes and treatment of shell shock in World War I before introducing how research and art now work with PTSD TBI Finally the book examines therapeutic cases of professional and non professional artists concluding with a discussion of synesthesia and the senses

The Death of Authentic Primitive Art Shelly Errington, 2023-09-01 In this lucid witty and forceful book Shelly Errington argues that Primitive Art was invented as a new type of art object at the beginning of the twentieth century but that now at the century s end it has died a double but contradictory death Authenticity and primitivism both attacked by cultural critics have died as concepts At the same time the penetration of nation states the tourist industry and transnational corporations into regions that formerly produced these artifacts has severely reduced supplies of primitive art bringing about a second death Errington argues that the construction of the primitive in the nineteenth and twentieth centuries and the kinds of objects chosen to exemplify it must be understood as a product of discourses of progress from the nineteenth century European narrative of technological progress to the twentieth century narrative of modernism to the late twentieth century narrative of the triumph of the free market In Part One she charts a provocative argument ranging through the worlds of museums art theorists mail order catalogs boutiques tourism and world events tracing a loosely historical account of the transformations of meanings of primitive art in this century In Part Two she explores an eclectic collection of public sites in Mexico and Indonesia a national museum of anthropology a cultural theme park an airport and a ninth century Buddhist monument newly refurbished to show how the idea of the primitive can be used in the interests of promoting nationalism and economic development Errington s dissection of discourses about progress and primitivism in the contemporary world is both a lively introduction to anthropological studies of art institutions and a dramatic new contribution to the growing field of cultural studies
