

## USING THE MINI BOOK

The mini-book template is super-easy to use! The cutting or pasting needed to create this template is minimal. Just lengthen (or shorten) the dimensions and then again in the other direction. (Note: Your students have to use a 4-page book mostly to be filled with great evidence of learning.)

The mini-book can be used as a book report, to show sequential steps in a process, to highlight a vocabulary word found on third page 2 - definition, page 3 the acronym, page 4 use the word in a sentence, to highlight a math word with an example, to summarize a book, and much more!

## USING FRENCH DOOR FOLDABLES

Large French Door Foldables are not difficult to make and are a great way to organize information. Here is how:

1. Cut on all the solid lines.
2. Fold on all the dotted lines.
3. Close the back of the book, then fold and paste it into notebook or onto plain paper.
4. Label doors with necessary information and write/illustrate corresponding information before the doors.

Here the Double French Door Example on the following page.

French Door Foldables (Single & Double)

## USING ACCORDION FOLDABLES

Accordion foldables are a student favorite! They're almost like making "folded fans" or "fans" to make one.

1. Cut on all the solid lines.
2. Fold in alternating directions on all the dotted lines.
3. Make another illustration of the placement in notebooks or to display in the classroom.

Accordion foldables are the perfect way to show steps in a process, such as long division, organizing "how to" information, highlighting the main events of a novel, recording the results of a major test, and the list goes on!

**Strategies for Teaching Mathematics** Deborah V. Mink, Linda H., Janis K. Drab Fackler, 2009-07-15 Enhance mathematics instruction and build students understanding of mathematical concepts with this practical research based resource Choose from a wide range of easy to implement strategies that enhance mathematics instruction including developing students mathematical vocabulary and problem solving abilities assessing students mathematics thinking and using manipulatives Highlights include tips on planning instruction and managing the mathematics classroom plus differentiation strategies for each lesson This resource is correlated to College and Career Readiness and other state standards Getting to the Common Core Sharon L. Spencer, Sandra Vavra, 2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Value s of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research
