country However as is always the case with technology time marches on and Ford had a new design with many improvements in mind Enter the 385 family of engines also known as the Lima big block Produced from 1968 1998 the 385 series engines were used in multiple applications from industrial trucks to muscle cars and luxury cruisers In Ford 429 460 Engines How to Build Max Performance which was written by Ford expert Jim Smart all aspects of performance building are covered including engine history and design induction systems cylinder heads the valvetrain camshaft selection the engine block and rotating assemblies The best options optimal parts matching aftermarket versus factory parts budget levels and build levels are also examined The 429 460 engines are a good platform for stroking so that is covered here as well Whether you want to build a torque monster engine for your off road F 150 a better performing version of a 1970s era smog motor for your luxury Lincoln or an all out high horsepower mill for your muscle car this book is a welcome addition to your performance library
