

AP® Human Geography Free-Response Question #1

(20 minutes)

Read the passage.

Answer the question.

Over the past century, the world has experienced a massive increase in the number of people living in urban areas. This increase has led to a number of challenges, including a rise in air pollution, traffic congestion, and a loss of green space.

One of the most significant challenges is the loss of green space. As urban areas expand, they often replace natural habitats and green spaces with buildings and roads. This loss of green space can lead to a number of problems, including a decrease in air quality and a loss of biodiversity.

One way to address this problem is by creating green roofs. Green roofs are roofs that are covered in plants and vegetation. They can help to reduce air pollution, improve air quality, and provide a habitat for wildlife.

Another way to address this problem is by creating green walls. Green walls are walls that are covered in plants and vegetation. They can help to reduce air pollution, improve air quality, and provide a habitat for wildlife.

Write an essay in which you

1. Analyze the passage and explain how the loss of green space can lead to a decrease in air quality and a loss of biodiversity.
2. Discuss the benefits of green roofs and green walls in reducing air pollution and improving air quality.
3. Explain how green roofs and green walls can provide a habitat for wildlife.
4. Evaluate the effectiveness of green roofs and green walls in addressing the problem of the loss of green space.
5. Conclude your essay by explaining why you think green roofs and green walls are the best way to address the problem of the loss of green space.
