component is a 26.1 megapixel APS-C X-Trans CMOS 4 sensor which when combined with the X-Processor 4 produces very detailed and accurate color photographs at high resolutions. Sharp and colorful images are ensured by the special X-Trans sensor array which reduces moiré and false colors without the need for an optical low-pass filter. The newly created 23mm f/2 fixed lens which is ideal for both still and video photography is a major feature. With its adaptable 35mm equivalent focal length, this lens is ideal for a variety of shooting situations including portraiture and street photography. Additionally, the lens has enhanced close-up capabilities, lowering the required minimum focusing distance for excellent macro photography. With ease, the X100VI can switch between an optical OVF and an electronic viewfinder EVF thanks to its advanced hybrid viewfinder. Photographers may now make use of the greatest features of both systems: the real-time digital display of the EVF and the clarity of the OVF. With 425 phase-detection points, the improved autofocus capabilities provide fast and precise focusing even in dim light. In addition, the camera records stunning 4K video at 30 frames per second, making it a useful tool for both filmmakers and photographers. The X100VI maintains the series signature retro-inspired aesthetic which includes a sturdy weather-sealed shell and simple manual controls. Due to its lightweight design and small size, it's the perfect travel companion for photographers. While using the Fujifilm X100VI, there are several things to know and learn from the Fujifilm X100VI in this guide as well.
