Transformation Audit 2011 Jan Hofmeyr,2012-03-07 The 2011 Transformation Audit presents a collection of articles by South African thought leaders which asks how the country can set goals and achieve them in a hostile global climate that threatens developmental gains that have been painstakingly achieved For nearly two decades South Africans have conducted exhaustive analyses of the country s challenges embarked on bold scenario exercises and more recently produced forward looking strategies aimed at addressing these challenges The most eminent of these in recent years were the Department of Economic Development s New Growth Path and the National Planning Commission s Draft National Development Plan We know now what the problems are and by and large what needs to change to address them Courage is required now to forge consensus to take decisions on strategies and to start implementing them As in previous years this publication with its slightly different format and appearance seeks to provide analysis and provoke debate on how this might be achieved

The Art of Uncertainty David Spiegelhalter,2025-03-04 Named a Best Book of the Year by Forbes and The Economist From our greatest living statistical communicator Tim Harford comes an invaluable data driven guide for understanding and learning to embrace risk and uncertainty in our daily lives How dangerous is our diet How much of sports falls into the realm of luck When authorities categorize a given event as highly likely how likely is that really Whether we re trying to decide if the benefits of a new medication are worth the chance of side effects or if artificial intelligence truly threatens humanity our lives are riddled with uncertainties both everyday and existential yet it can be difficult to know how to properly weigh all those unknowns Luckily for us renowned statistician David Spiegelhalter has spent his career dissecting data to resolve the apparently random and decode the many decisions we face with imperfect information In *The Art of Uncertainty* he shows how we can become better at dealing with what we don t know to make

smarter choices in a world so full of puzzling variables In lucid lively prose Spiegelhalter guides us through the principles of probability illustrating how they can help us think more analytically about everything from medical advice to sports to climate change forecasts He demonstrates how taking a mathematical approach to phenomena we might otherwise attribute to fate or luck can help us sort hidden patterns from mere coincidences better evaluate cause and effect and predict what is likely to happen in the future Along the way we learn how a misinterpretation of a probability contributed to the infamous Bay of Pigs fiasco why a ship twice the size of the Titanic sank without a trace and why we can be so confident that no two properly shuffled decks of cards have ever been in the same order Sparkling with wit and fascinating real world examples this is an essential guide to navigating uncertainty while also retaining the humility to admit what we don't or simply cannot know

The Armed Forces Covenant in action? Great Britain: Parliament: House of Commons: Defence Committee, 2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 35 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country

Citizenship and Democracy in Further and Adult Education Neil Hopkins, 2013-07-30 This book addresses the questions why citizenship education is an important subject for students in further and adult education and why we need democratic colleges to support the study of citizenship education It investigates the historical roots of further and adult education and identifies how the adoption of citizenship education in the post compulsory sector can enrich vocational studies in further education and programmes in adult education It is argued that democratic colleges are vital to ensure that citizenship education informs the decision making process throughout educational institutions and as a means of establishing fair and equal representation for important stakeholders The author has worked in both sectors for over a decade and uses this experience to offer a blend of educational practice and philosophical investigation The result is a work that appeals to both teachers in further and adult education as well as academics and students interested in philosophy of education

Teaching 14-19 Learners in the Lifelong Learning Sector Sheine Peart, Liz Atkins, 2011-01-14 More and more

teachers in the lifelong learning sector are required to teach the 14-19 age group. This book is a practical guide to delivering learning to 14-19s. It begins by looking at the background to teaching 14-19 in FE and covers current pathways for achievement. Coverage of effective delivery of the new Diploma qualification is included, giving guidance on planning and assessment. It goes on to explore the challenges of behaviour, participation and re-engaging disaffected learners. Finally, it considers the wider context of building partnerships with schools and the needs of industry and employers.

Surrender
Nicholas Comfort, 2012-02-23
British industry at the start of the New Elizabethan Age was a world leader. The first British jet airliner was taking to the skies, the first nuclear power station was under construction at Calder Hall and British firms were pioneering the computer. Our shipyards reigned almost supreme and from Britain's factories came cars, lorries, buses, heavy machinery, aircraft and locomotives exported all over the world. Sixty years on, many of these industries and millions of jobs have disappeared while competitors have flourished. Much of what remains is under foreign ownership. Britain has lost many export markets and essential goods have to be imported. How did all this happen? Britain's loss of competitiveness has traditionally been blamed on outdated working practices, failure to invest and modernise, poor management, bloody-minded unions, the loss of Empire and the inability of post-war Germany and Japan to rebuild from scratch. All this is true, but the picture is far more complex. The role of Whitehall and successive governments, Britain's relationship with Europe, corporate greed, misjudgement and even suicide and sheer bad luck all play a part. In *Surrender*, Nicholas Comfort revisits the past six decades and identifies some of the factors behind the greatest mass extinction since the dinosaurs.

The Truth About Our Schools
Melissa Benn, Janet Downs, 2015-11-06
A superb, crucial, blistering expose of all the myths about our education system that are all too often used to attack it. Melissa Benn again proves why she is one of the country's most formidable education campaigners and why the powerful should fear her. Owen Jones, Guardian columnist and best-selling author. Never has it been more urgent to publicise the truth about what works and doesn't work in our education system. Debunking the ideology of marketisation and exposing the half-truths that pass for objective reporting, Benn and Downs meticulously lay out the evidence that a national system of comprehensive schools delivers the best outcomes. This hugely important book should be required reading for each new Education Secretary. Caroline Lucas MP. Opinions about comprehensive education are often made into easy-to-swallow sound bites by media and politicians alike and whilst the benefits of a genuinely comprehensive education for all pupils are obvious, untruths have unwittingly evolved into hard facts. Based on Melissa Benn and Janet Downs' work as part of the pioneering Local Schools Network, *The Truth About Our Schools* calls for us to urgently and articulately challenge unquestioned myths about state education. Benn and Downs have meticulously built an argument for its still enormously vital role and rigorously challenge assumptions that Comprehensive education has failed. Local authorities control and hold back schools. Choice, competition and markets are the route to educational success. Choice will improve education in England, the free school model, Academies raise standards. Teachers don't need qualifications. Private schools

have the magic DNA Progressive education lowers standards Anyone who thinks that comprehensive education cannot deliver that local authorities are the chief block to improving our school system that competition and markets are the route to educational success and that private schools hold the magic DNA that can simply be transferred to other state schools will have their beliefs shaken by this blisteringly incisive book
