Gcse Exam Boards Uk:

2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do **The administration of examinations for 15-19 year olds in England** Great Britain:

Parliament: House of Commons: Education Committee, 2012-07-03 This report from the Education Committee looks at the administration of examinations for 15-19 year olds in England The Committee expresses serious concerns about incentives in the exam system and about competition on syllabus content Incentives in the system should be changed so the downward pressure through the competition of exam boards is mitigated The Committee considers a number of options to change incentives including i A single board This offers a simpler system with no risk of competition but the Committee believes the cost risk and disruption outweigh the benefits ii Franchising of subjects to exam boards This removes syllabus competition but again has downsides 3 Or the current system of multiple boards The Committee sees no benefit in competition on syllabus content but the setting and marking of exams and associated administration if properly regulated could generate incentives and drive quality up offering value for money to schools and colleges The Committee also recommends the development of national syllabuses accredited by Ofqual The syllabuses would be developed by exam boards in conjunction with learned bodies and employer organisations and could therefore retain the benefits of competition on quality and the incentive for exam boards to innovate

online tutor *Engaging Students with Music Education* Pete Dale, 2017-03-27 *Engaging Students with Music Education* is a groundbreaking book about using DJ decks and urban music in mainstream schools to re-engage disaffected learners and develop a curriculum which better reflects overall contemporary tastes. Many young learners are at risk of exclusion; this book argues that for such individuals the implications of such a shift in the music curriculum could be especially positive. Drawing extensively on the author's own wealth of teaching experience and bridging the gap between practice and theory, this book demonstrates through case studies that DJ decks can prove extremely valuable in mainstream classroom situations across the secondary school age ranges. Addressing challenging and crucial topics, combining rigorous theoretical analysis with practical suggestions, the book addresses questions such as: Are DJ decks actually a musical instrument and are they suitable for classroom teaching? Will Ofsted's school inspectors approve of music teaching involving DJ decks and urban music? If we bring urban music into the classroom, will this further marginalise classical music? Are DJing and MCing skills recognised within examination specifications at least in the UK? Current teachers will find the practical advice on how to incorporate DJ decks and urban music into their classroom especially helpful, whilst educational researchers will be captivated by the critical discussion of the child-centred tradition and a theoretical approach which stretches from continental philosophy to practice-based reflection. With an insistence that the starting point for music education should always be the interests and experiences of the learners, this book is essential reading for those music teachers and researchers interested in the benefits of non-standard music making in the classroom.

International Handbook of Technology Education, 2006-01-01 This first volume in the International Technology Education Series offers a unique worldwide collection of national surveys into the developments of Technology Education in the past two decades. For twenty-two countries from five continents, the major changes of this school subject are described by experts that have been involved in these changes for many years themselves. The studies deal with national curricula, teacher education programs, educational research into effects of Technology Education, and practical issues at classroom level. After the 15th International Pupils' Attitude Towards Technology conference which was held in Haarlem in April 2005, a distinguished group of scholars from the area of Technology Education decided that after 20 years it was time to give account of the state of the art in this area. This book should be of interest to students, teachers, researchers, and policy makers who are involved in technology education.

Remembering the First World War Bart Ziino, 2014-12-05 Remembering the First World War brings together a group of international scholars to understand how and why the past quarter of a century has witnessed such an extraordinary increase in global popular and academic interest in the First World War both as an event and in the ways it is remembered The book discusses this phenomenon across three key areas The first section looks at family history genealogy and the First World War seeking to understand the power of family history in shaping and reshaping remembrance of the War at the smallest levels as well as popular media and the continuing role of the state and its agencies The second part discusses practices of remembering and the more public forms of representation and negotiation through film literature museums monuments and

heritage sites focusing on agency in representing and remembering war The third section covers the return of the War and the increasing determination among individuals to acknowledge and participate in public rituals of remembrance with their own contemporary politics What for instance does it mean to wear a poppy on armistice remembrance day How do symbols like this operate today These chapters will investigate these aspects through a series of case studies Placing remembrance of the First World War in its longer historical and broader transnational context and including illustrations and an afterword by Professor David Reynolds this is the ideal book for all those interested in the history of the Great War and its aftermath

Everything for Sale? The Marketisation of UK Higher Education Roger Brown, Helen Carasso, 2013-02-11 The marketisation of higher education is a growing worldwide trend Increasingly market steering is replacing or supplementing government steering Tuition fees are being introduced or increased usually at the expense of state grants to institutions Grants for student support are being replaced or supplemented by loans Commercial rankings and league tables to guide student choice are proliferating with institutions devoting increasing resources to marketing branding and customer service The UK is a particularly good example of this not only because it is a country where marketisation has arguably proceeded furthest but also because of the variations that exist as Scotland Wales and Northern Ireland increasingly diverge from England In *Everything for Sale* Roger Brown argues that the competitive regime that is now applicable to our Higher Education system was the logical and possibly inevitable outcome of a process that began with the introduction of full cost fees for overseas students in 1980 Through chapters including Markets and Non Markets The Institutional Pattern of Provision The Funding of Research The Funding of Student Education Quality Assurance The Impact of Marketisation Efficiency diversity and equity He shows how the evaluation and funding of research the funding of student education quality assurance and the structure of the system have increasingly been organised on market or quasi market lines As well as helping to explain the evolution of British higher education over the past thirty years the book contains some important messages about the consequences of introducing or extending market competition in universities core activities of teaching and research This timely and comprehensive book is essential reading for all academics at University level and anyone involved in Higher Education policy
