Measurement, Volume 1 Ghenadii Korotcenkov, 2018-03-15 The first volume of *The Handbook of Humidity Measurement*

focuses on the review of devices based on optical principles of measurement such as optical UV fluorescence hygrometers optical and fiber optic sensors of various types Numerous methods for monitoring the atmosphere have been developed in recent years based on measuring the absorption of electromagnetic field in different spectral ranges These methods covering the optical FTIR and Lidar techniques as well as a microwave and THz ranges are discussed in detail in this volume The role of humidity sensitive materials in optical and fiber optic sensors is also detailed This volume describes the reasons for controlling the humidity features of water and water vapors and units used for humidity measurement Signal and Image Processing for Remote Sensing C.H. Chen,2006-10-09 Most data from satellites are in image form thus most books in the remote sensing field deal exclusively with image processing However signal processing can contribute significantly in extracting information from the remotely sensed waveforms or time series data Pioneering the combination of the two processes Signal and Image Processing for Remote Sensing provides a balance between the role of signal processing and image processing in remote sensing Featuring contributions from worldwide experts this book emphasizes mathematical approaches Divided into two parts Part I examines signal processing for remote sensing and Part II explores image processing Not limited to the problems with data from satellite sensors the book considers other sensors which acquire data remotely including signals and images from infrasound seismic microwave and satellite sensors It covers a broader scope of issues in remote sensing information processing than other books in this area With rapid technological advances the mathematical techniques provided will far outlast the sensor software and hardware technologies Focusing on methodologies of signal processing and image processing in remote sensing this book discusses unique techniques for dealing with remote sensing problems **Image Processing for Remote Sensing** C.H. Chen,2007-10-17 Edited by leaders in the field with contributions by a panel of experts Image Processing for Remote Sensing explores new and unconventional mathematics methods The coverage includes the physics and mathematical algorithms of SAR images a comprehensive treatment of MRF based remote sensing image classification statistical approaches for
