8 key tips for creating effective Midjourney prompts

Keep prompts short and specific: Avoid exceeding around 40 words, as any extra words likely won't influence the outcome. Having more words also increases the competition among elements for priority in the generated image.

Begin with crucial keywords: The initial 5 words are highly influential, with influence diminishing thereafter. Despite recent updates that take into account token strength (the significance of each word), the order of words remains important.

Use correct grammar: From version 5, Midjourney utilizes Natural Language Processing (NLP), so full-sentence prompts with correct grammar can yield more coherent results.

Follow a prompt template: Although not strictly necessary, following a specific structure (type of image, main object, surroundings, style details, parameters) can improve the effectiveness of your prompt.

Use Sliders and Cowbells tricks: Text weights can be used to adjust the influence of specific words. You can increase the weights of ignored words (sliders) or repeat them multiple times (cowbells).

Avoid quality enhancement keywords: Words like "photorealistic", "realistic", "ultra-detailed", "8K", etc., usually don't impact the generated images and may even obstruct the desired outcome.

Use ChatGPT for inspiration: This AI can serve as an excellent brainstorming tool. It can be used to generate concise one-sentence image descriptions, which can then be combined to create imaginative prompts.

Experiment: Midjourney allows experimenting with different styles, colors, angles, and lighting. This enhances creativity and brings out new possibilities that would be challenging without AI.
