The Graphic Standards Guide to Architectural Finishes ARCOM, The American Institute of Architects, 2003-03-24 From ARCOM and The American Institute of Architects. A complete visual guide to choosing and using finish materials. In this unique guide, the authors of MASTERSPEC and *Architectural Graphic Standards* join forces to offer architects vital, single source access to the unbiased information they need to evaluate, select and specify the best finish materials for any job. This powerful visual resource combines hundreds of illustrations from *Architectural Graphic Standards* with corresponding building material performance and specification information from AIA's MASTERSPEC, published by ARCOM. Use this book during the schematic and design development phases of a project and as an indispensable aid for product selection and specification. Essential for architects, interior designers and building designers, this vital reference provides information to make informed decisions about specific design goals such as affordability, environmental friendliness, durability, fire resistance and esthetic success. Features include: Unique source of independent, in-depth building product performance information, the one source that gives you reliable building product information before you consult with manufacturers. Covers a full range of standard finish materials and includes selection criteria, details, typical product sizes and installation and maintenance data. Provides current standards based on research by government association and independent testing organizations as well as the input of experienced architects and specifiers. *Architectural Graphic Standards* has served the design community for decades as a virtual bible for architectural detailing. Governing by Design Aggregate Architectural History Collaborative, 2012-04-29 *Governing by Design* offers a unique perspective on twentieth century architectural history. It disputes the primacy placed on individuals in the design and planning process and instead looks to the larger influences of politics, culture, economics, and globalization to uncover the roots of how our built environment evolves. In these chapters, historians offer their analysis on design as a vehicle for power and as a mediator of social currents. Power is defined through a variety of forms: modernization, obsolescence, technology, capital, ergonomics, biopolitics, and others. The chapters explore the diffusion of power through the establishment of norms and networks that frame human conduct, action, identity, and design. They follow design as it functions through the body in the home and at the state and international level. Overall, *Aggregate* views the intersection of architecture with the human need for what Foucault termed governmentality: societal rules, structures, repetition, and protocols as a way to provide security and tame risk. Here, the conjunction of power and the power of design reinforces governmentality and infuses a sense of social permanence despite the exceedingly fluid nature of societies and the disintegration of cultural memory in the modern era.

Programming and Research Rose Mary Botti-Salitsky, 2017-03-09 *Programming and Research Skills and Techniques for Interior Designers* provides a step by step approach to mastering the process of documenting client and user requirements for any design project. Replete with examples and analyses of student and professional work, this book guides its readers through the creation of their own program documents. Both the National Council for Interior Design Qualification (NCIDQ) and the Council for Interior Design Accreditation (CIDA) consider programming a required core of knowledge. *Programming and Research* focuses on how the study of programming for interior designers prepares students for and advances them into the professional realm. This second edition is updated with the latest information; interior designers must be equipped with including new coverage on evidence based design, integrated project delivery (IPD), building information modeling (BIM), design across disciplines, LEED programming, designing on a budget, and time management. *Reconstructing Italy* Stephanie Zeier Pilat, 2016-04-08 *Reconstructing Italy* traces the postwar transformation of the Italian nation through an analysis of the Ina Casa plan for working class housing established in 1949 to address the employment and housing crises. Government sponsored housing programs undertaken after WWII have often been criticized as experiments that created more social problems than they solved. The neighborhoods of Ina Casa stand out in contrast to their contemporaries both in terms of design and outcome. Unlike modernist high rise housing projects of the period, Ina Casa neighborhoods are picturesque and human scaled and incorporate local construction materials and methods, resulting in a rich aesthetic diversity. And unlike many other government forays into housing undertaken during this period, the Ina Casa plan was on the whole successful; the neighborhoods are still lively and cohesive communities today. This book examines what made Ina Casa a success among so many failed housing experiments, focusing on the tenuous balance struck between the legislation

governing Ina Casa the architects who led the Ina Casa administration the theory of design that guided architects working on the plan and an analysis of the results the neighborhoods and homes constructed Drawing on the writings of the architects government documents and including brief passages from works of neorealist literature and descriptions of neorealist films by Pier Paolo Pasolini Italo Calvino and others this book presents a portrait of the postwar struggle to define a post Fascist Italy
