

Chapter 8 Learning Guide – Political Geography

Key Issue 1 – *Where Are States Located?*

Pgs. 238 – 247

Problems of Defining States

1. Define *state*:
Area organized into a political unit ruled by an established government that has control over its internal & foreign affairs; it occupies a defined territory & has permanent population
2. Define *sovereignty*:
Ability of a state to govern its territory without intervention from other states
3. There is some disagreement about how many states there actually are in the world because of regions which may, or may not, actually be states. Complete the chart to demonstrate three cases.

Korea (North & South)	People's Democratic Republic of China (China) and/or Republic of China (Taiwan)	Western Sahara or Sahrawi Republic
One state if you agree that... The Korean govt's should unify into one	One state if you agree that... China has control of Taiwan	One state if you agree that... The Polisario Front has rightful control of the territory
Two states if you agree that... According to the UN they are 2 separate states	Two states if you agree that... Nationalists control Taiwan & agree with most countries that they are separate sovereign states	No state if you agree that... Morocco has control of the territory

Varying Size of States

4. List the 6 **largest** states in order.
Russia, Canada, United States, China, Brazil & Australia
5. How many **microstates** are recognized? What do many have in common? List 6 that you can find on a map, and state where they are. (If you can only come up with 3 on your own, you'll have to look up three more!)
24; many are islands in the Caribbean, Pacific & Indian Oceans
