Banking Regulation in Africa Folashade Adeyemo, 2021-12-28 There is little literature on the development of banking regulation in Nigeria or the scope of powers of the Central Bank of Nigeria which is its core banking sector regulator The critical impetus of this book is to contribute to the literature of this area with a detailed exploration of the Nigerian regulatory architecture In addition the book also engages in a comparative analysis with two emerging economies in Africa South Africa and Kenya It also considers the UK and the US as comparator jurisdictions in light of their regulatory responses to the global financial crisis of 2008 This book contributes to the ongoing discourse in this area by exploring in detail the theoretical underpinnings of regulation and supervision to determine whether there is an understanding of what constitutes effective regulation in these jurisdictions Given that Nigeria is the core jurisdictional focus a historical account of banking exchanges from the pre colonial era to more recent times is provided Offering an understanding of how political local and economic settings in conjunction with the theories of regulation have impacted and influenced regulatory development in Nigeria the book engages in an examination of Nigeria's historical experiences with bank failures including the banking crisis it experienced in 2008 The newly enacted Banks and Other Financial Institutions Act 2020 is also explored as part of this discourse Through a critical analysis of the law the book demonstrates that the Nigerian regulator has historically adopted a reactionary strategy instead of a proactive and pragmatic approach which is imperative for an effective regulatory regime The outcome of this analysis is that there are lessons to be learned and proposals are discussed in order to rethink the act of banking regulation
