Spindler, 2013-04-10 The book is written for active learners those keen on cutting their own path through the complex and at times hardly comprehensible world of THEORY in International Relations To aid this process as much as possible this book employs the didactical and methodical concept of integrating teaching and self study The criteria for structured learning about IR theory will be derived from an extensive discussion of the questions and problems of philosophy of science Part 1 Theory of IR refers to the scientific study of IR and covers all of the following subtopics the role and status of theory in the academic discipline of IR the understanding of IR as a science and what a scientific theory is the different assumptions upon which theory building in IR is based the different types of theoretical constructions and models of explanations found at the heart of particular theories and the different approaches taken on how theory and the practice of international relations are linked to each other The criteria for the structured learning process will be applied in Part 2 of the book during the presentation of five selected theories of International Relations The concept is based on learning through example that is the five theories have been chosen because when applying the criteria developed in Part 1 of the book each single theory serves as an example for something deeply important to learn about THEORY of IR more generally Theories of International Relations Siegfried Schieder, Manuela Spindler, 2014-05-23 This book is a comprehensive guide to theories of International Relations IR Given the limitations of a paradigm based approach it sheds light on eighteen theories and new theoretical perspectives in IR by examining the work of key reference theorists The chapters are all written to a common template The introductory section provides readers with a basic understanding of the theory s genesis by locating it within an intellectual tradition paying particular attention to the historical and political context The second section elaborates on the theory as formulated by the selected reference theorist After this account of the theory s core elements the third section turns to theoretical variations examining conceptual subdivisions and overlaps further developments and internal critique The fourth section scrutinizes the main criticisms emanating from other theoretical perspectives and highlights points of contact with recent research in IR The fifth and final section consists of a bibliography carefully compiled to aid students further learning Encompassing a broad range of mainstream traditional theories as well as emerging and critical perspectives this is an original and ground breaking textbook for students of International Relations The German edition of the book won the Geisteswissenschaften International Prize collectively awarded by the Fritz Thyssen Foundation the German Federal Foreign Office and the German Publishers Booksellers Association *International Relations Theory* Oliver Daddow, 2009-03-19

SAGE Course Companions provide students with an insider's guide into how to make the most of their undergraduate courses and extend their understanding of the key concepts covered. Ideal for anyone new to the study of international relations or looking for a refresher, this Course Companion includes a comprehensive introduction to the competing theories at the heart of the discipline as well as hints and tips on how to apply them when tackling coursework or examinations. Written in a straightforward and clear style, it is designed to augment rather than replace existing textbooks for the course and provides pointers to success in course exams and written assessment exercises, easy access to the key theories in international relations, guidance on the essential study skills required to pass the course, help with developing critical thinking, and taking it further, sections that suggest how readers can extend their thinking beyond the received wisdom.

International Relations, 5th Edition V.N. Khanna, The fifth edition of *International Relations* covers the subject from the historical perspective from the eve of the First World War to the end of the Cold War and beyond. This book is divided into two sections: the first deals with the theoretical perspectives while the second provides an historical overview of events. These include the two World Wars, problems faced in peace making, system of alliances, search for security, Nazism and Fascism, rise of communism, the arms race and disarmament, the Cold War and its end, Non Aligned Movement and the emergence of regional organizations. The book is a useful resource for teachers and students of history and political science, those appearing for civil services examinations as well as those interested in international relations. **KEY FEATURES** Thoroughly revised and updated to cover the latest developments. Enlarged to cover theoretical aspects: realism, neo realism, liberalism and neo liberalism, dependency and feminist approaches. Covers recent historical developments such as the Gulf War and the new international economic order.
