Hooydonk, 2006 A study carried out in the framework of the Maritime Transport Coordination Platform of the European
Commission Directorate General Energy and Transport **The Habitats Directive** Gregory Jones KC, 2012-11-05
Biodiversity within the European Union is under threat Almost a quarter of Europe's vascular plant species and 155 species
of its native mammals birds reptiles and amphibians are threatened with extinction The Habitats Directive imposes a strict
regime for environmental protection But with the euro zone economy falling from stagnation to contraction in the second
quarter of 2012 and the UK entering into a double dip recession in April 2012 European governments face an economic crisis
The English courts have said that the Directive should not become a property developer's obstacle course Yet the tensions
between environmental protection and economic growth are all too readily apparent with the UK government stating both
that we must arrest the decline in habitats and species and the degradation of landscapes and later that gold plating of EU
rules on things like habitats was putting ridiculous costs on business enterprise Edited by Gregory Jones QC The Habitats
Directive A Developer's Obstacle Course brings together a unique combination of leading academics and practitioners in the
field of European environmental and planning law to address and debate controversial issues arising from the Habitats
Directive in an authoritative and practical manner A must for anyone engaged in property development planning and
environmental law **Progress in Marine Conservation in Europe** Henning Nordheim, Dieter Boedeker, Jochen C.
Krause, 2006-06-18 This volume offers insight in the identification and selection procedure of marine protected areas in the
German exclusive economic zones EEZs of the North and Baltic Seas EU Member States are obliged to establish a coherent
network of protected areas consisting of sites identified under the EC Habitats and Birds Directives The goal of this Natura
2000 network is the conservation of biodiversity on land and in the sea To fill important gaps in knowledge regarding the
presence abundance and distribution of certain species and habitats in the German North and Baltic Seas the German
Federal Agency for Nature Conservation BfN initiated a detailed research programme involving researchers from many
renowned German marine research institutes This book contains the main results of the different projects under this
research programme which formed the basis for the identification and selection of the Natura 2000 sites Information is given
on two NATURA 2000 habitats sandbanks and reefs and benthic species fish birds and marine mammals as well as on legal
aspects and implementation procedures Last but not least the book introduces the current status of NATURA 2000 in the

German EEZ Target audience are not only scientists but also policymakers environmental organisations and other stakeholders and the book includes many illustrations
