

which you must read and explain to the respondent(s) before conducting the interview. Each respondent must make their mark on the consent form, which you will then sign to testify that the person consented to be interviewed. Complete a separate consent form for each respondent. The consent form is in Annex 1.

Confidentiality

It is critical that all information obtained from the MDR interviews remains strictly confidential. You are not permitted to discuss the findings from an interview, gossip about it, or show your records to anyone other than your supervisor. Make all entries on the questionnaires yourself. Do not leave your verbal autopsy forms lying around where unauthorized persons may have access to them.

Maintaining confidentiality is an ethical responsibility that we all share. It is necessary to protect the respondents from any repercussions that might occur as a result of the information they have provided. It is also necessary to maintain the trust of the community and assure that people will be willing to talk openly to us about the maternal deaths.

Falsification of data

Your job as an interviewer will not always be easy. There may be times when you have to visit a household more than once to meet with the best respondent. The interview will often take one hour or longer to complete. Many of the questions seek sensitive information that may appear to reflect badly on care provided to women by their families and sometimes by the health system. All these conditions can lead to temptations to falsify data in order to quickly complete the interview and not record painful facts. However, you must never falsify your work. The whole purpose of the MDR project is to collect and share information with the community that can be used to prevent maternal deaths. This will be possible only if the information collected is truthful. It is your responsibility to assure that you maintain this standard. You should work as an interviewer only if you are certain you can accomplish this.
